Oil Burners on Frisco.
Muskogee, I. T., June 22.—After testing the crude oil obtained in the Cherokee oil fields in the engines of the Frisco Railroad Company, in the place of coal, Frisco officials declare it is a pronounced success, and is in many ways far superior to coal. Oil is now being burned in the engines of this road out of Kansas City as far south as Springfield. The first test of the new fuel was made in passenger engines two weeks ago, and since that time not a pound of coal has been used. The road has been burning oil in its switch engines near Sulphur for two years.

New Frisco Superintendent.
Denison, Texas, June 22.—A. J. Giger, formerly with the operating department of the Colorado and Southern, has been appointed superintendent of the Red River division of the Frisco, with headquarters at Francis, I. T., vice, J. W. Walton, who resigned to succeed A. D. Birtchard as superintendent of transportation and car service for the Katy, with headquarters in Denison.

Sure!
With Roff and Ada prospecting for oil and gas and Fitzhugh after zinc and lead, it's only a matter of time till Pontotoc will be among the banner mineral producing counties of the new state.—Roff Eagle.

Mr. Hamilton Here.
J. A. Hamilton, vice president of the Ada Electric and Gas company, is here from Marissa, Ill., both on business and pleasure bent. His company is naturally interested in the electric railway project described in Friday's News.

Something Needed Portland Park Addition

Lots near the big Cement Plant to accommodate the hundreds of laborers to be employed in this great industry. This need has been met by laying out the Portland Park Addition just west of the cement plant. Lots are 30 feet by 140, with 60-foot streets and 20-foot alleys. Prices of lots are from \$20 to \$30. Terms, \$5 down and \$2 per month. A large reservoir is to be built on the north side by the cement company which will afford boating and fishing.

The Title is Perfect and the Location Sightly and Healthful.
Get on Easy Street by Buying Lots in Portland Park.
Homes in the Reach of All in Portland Park Addition.
Plant your Money in Portland Park and let it Grow.

Real Estate is the foundation of wealth—it's safe and sure. Get in on the ground floor at Portland Park

Only room for 80 families in Portland Park while hundreds will be needed. This is the only land that will be available for years.
Have you seen Ada lots advance one hundred and even one thousand per cent, while you waited to see what the town would do? Take a tumble to yourself and buy lots in Portland Park. These lots are being sold at half their real value and on terms within the reach of all.

REPUBLICANS ARE REVOLTING

Want the Constitution and Statehood--Threaten to Overthrow Leaders Who are Trying to Commit Party to Contrary Attitude

Tulsa, I. T., June 22.—The announcement was made today by Judge Clarence L. Leeds, a prominent Indian Territory republican leader, that unless the republican state committee ceases its fight upon the constitution for Oklahoma by July 1, a mass meeting of the two Territories will be called in Tulsa to arrange for holding a state convention independent of the action of the state committee. The mass meeting will declare for immediate statehood, support of the constitution, and will pledge the republicans to amend the objectionable features of the constitution either by legislative act or by the initiative and referendum. The movement is backed by William Johnson of Bartlesville, a member of the republican state committee; Col. George Murphy of Muskogee, Col. William Busby of South McAlester and Henry P. Robbins of South McAlester, and it is said to have the endorsement of Judge W. G. Raymond, the republican leader of Muskogee.

STATE CLOSES ITS CASES

Court Overrules Haywood's Motion to Dismiss--Defense Must Produce Its Evidence--Adjournment Till Monday.

Boise, Idaho, June 21.—When the state today closes its case against William D. Haywood, charged with the murder of Frank Steinberg, the defense made an unsuccessful attempt to secure from the court an order directing the jury to acquit the prisoner. Judge Wood's ruling, which requires the defense to meet with evidence the case which the state has presented was made at 5:15 o'clock and it was then arranged that Haywood's counsel should make their opening statement and present their first testimony on Monday next.

When the trial opened this morning it was stipulated that the record should show the record of the draft sent by Haywood to Jack Simpkins late in 1905 was Dec. 21, and after that prosecution proceeded to show by a handwriting expert that George Pettibole, using the name of "J. Wolf" and of "P. Bone," made two remittances of money to Harry Orchard at San Francisco through the Pacific Postal Telegraph Company in the fall of 1904.

The state next called Jim Seahorn, a colored horse trader, who swore that he sold a horse and buggy to Orchard in Denver, 1905, and identified Haywood as one of the men who rode with Orchard.

After that the defense admitted that in June, 1905, Haywood sent \$75 to Steve Adams at Ogden, and when the necessary showing had been made on the record, the prosecution formally rested.

The motion for an instruction to the jury to acquit was by agreement presented at the afternoon session and the jury was sent back to the jury house out of hearing of the argument.

Attorney E. F. Richardson made the principal argument in support of the

motion, in a long, carefully prepared and eloquent address.

He took for his guide the Idaho statute which forbids conviction upon the uncorroborated testimony of an accomplice and, quoting many authorities in support of his contention that there must be convincing corroboration entirely independent of the testimony of the accomplice, made an analysis of all the testimony offered. He declared that none of the testimony could stand without support or Orchard's story and that the statute specifically forbid its acceptance under these circumstances.

He also argued that the testimony of Orchard was the only showing that in any way connected Haywood with the crime and that the statute forbade conviction under those circumstances.

Senator Borah, who also spoke for the state, argued with like force and eloquence that Haywood's connection had been independently shown and that Orchard's testimony had been corroborated by independent circumstances and evidence. He also submitted a general argument to show that the state had established the existence of a general conspiracy in which Haywood was a participant and in which he strongly developed the alleged participation and connection of Simpkins.

Clarence Darrow, who closed, pleaded that there was not a shred of evidence in the case capable of standing without the "rotten thread of Orchard's story" to sustain it, and that the plain provision of the Idaho statute made the duty of the court clear. He ridiculed the idea of general conspiracy and contended that if the most liberal allowances were made for the entire showing of the state that it would not make out a case against the prisoner worthy of submission to the jury.

ICE PLANT TO START UP

After Several Months' Shut-Down Trial Run Will Be Made Next Week.

R. L. Woodhouse, owner of the Ada Ice Plant, is here from Sharon Springs, Kansas, to overhaul the plant and to resume operation.

Several months ago the institution got entangled in court proceedings. Mr. Woodhouse says it is now entirely clear of any impending claims, and that some time next week he will start it up for a trial run. After months' of disuse, naturally the machinery requires considerable overhauling before it is fit for operation.

It so happens that the weather this season has been so changeable, that little has been lost by the plant's being shut down. So far all over the country the ice business has been a losing proposition this season.

SOROSIS YEAR-BOOK

Popular Woman's Club Preparing for Next Season's Work.

The News is just completing a neat job for Sorosis Club, the popular organization for Ada ladies. It is a dainty little year book, or outline of the work for the coming club year—October to April. Next season will be devoted to a thorough study of "Macbeth." The club meets twice a month with the members in rotation—hours 3 to 5, p. m.

Sorosis' motto is "In Unity There is Strength," colors, pink and green, flower, carnation. The present officers are: President, Mrs. R. F. King; Vice President, Mrs. C. E. Robertson; Secretary, Mrs. W. G. Broadfoot; Treasurer, Mrs. W. W. Sledge; Program Committee, Mrs. R. F. King, Mrs. I. J. Berry, and Mrs. W. S. Thomson.

Public Installation.

The order of the Eastern Star will have an elaborate function in the hall Saturday evening, June 29, to which the public is cordially invited.

The new officers will be installed and toothsome refreshments will be served. The Eastern Star has an enviable reputation for doing things

"handsome," and doubtless the hall will be full of visitors.

It Took a Ride.

Geo. Redding, living about eight miles southwest, was in town one day last week for the purpose of ordering a buggy wheel. A week ago a miniature cyclone entered into his place, kicked his smokehouse to pieces, tore down his buggy shed, hoisted his new buggy into the air, climbed into it and rode about 200 yards and placed it gently back on the ground. Before leaving it it tore every spoke out of one wheel, twisted the tire and buggy was uninjured. Untamed cyclones are dangerous animals.—Roff Eagle.

Indian Ball Games.

Senator Amos Hays, F. M. Hudson and Col Gus Angelly were in town today having printed some posters advertising Indian ball games between full blood Choctaws and Chickasaws.

They have gathered a big bunch of players from the surrounding country and will make a tour over the east, including Eureka Springs, Ark. The games will be played with all the marvelous skill and in all the picturesque which characterized the sport as engaged in by the aborigines centuries ago.

WHERE WAS THE CAT?

Admitting the Meat Owner Wanted to Be Shown Feline.

A certain family living in one of the suburbs of New York owned a kitten of which they were very fond. When they went away for the summer it was decided after various consultations to leave the kitten with the butcher, on condition that he should treat it with the greatest kindness and give it about a pound of meat a week, besides its daily allotment of cream. Some weeks after the family had closed the house for the summer the nominal head of the family visited the suburb to attend to some business matters, and decided that he might as well drop in at the butcher's to see how the kitten was getting along.

He found the kitten curled up in a corner asleep and apparently at peace with the world, but, far from being sleek or well fed in appearance, it was so thin that he felt constrained to call the attention of the butcher to the fact.

"Do you mean to say you have fed that cat a pound of meat during the last week?" he asked.

"I certainly have," responded the butcher.

"Put him on the scales and see how much he weighs."

The butcher did as requested, and gently deposited the kitten in the balance. The pointer indicated exactly one pound.

"Well, grunted the owner of the animal, 'there's the pound of meat all right, but where's the cat?'"

TREES THAT ARE A MYSTERY.

One a Vegetable Freak and the Other a Greedy Monopolist.

California has one tree which is the personification of mystery. Found nowhere else in the world, it had a mysterious origin and thrives in a region of mystery.

The Mojave yucca is a vegetable freak which has developed into a species. It has the characteristics of several plants, to which no relationship can be traced.

It is an endogen, yet its bark shows concentric rings such as characterize the exogenous stems. It lives and thrives in great numbers in a region early devoid of vegetation, in a land of heat and thirst and barrenness.

Another tree in California which has a peculiar personality is the creeping oak of Monterey.

Nowhere in the vegetable kingdom can be found so true a representative of monopoly. This tree is of gnarly growth, its limbs, like those of the sycamore, bending and twisting in all directions.

Wherever a branch touches the earth it takes root and becomes, as it were, another trunk, though still a branch of the main stem, drawing nourishment both from the parent stem and from the new source. In this manner the tree is spread till it has taken possession of five acres of ground and it is still advancing.

Something of a Talker.

"Jobkin's wife has nervous prostration."

"What caused it?"

"Too much brain work."

"Brain work! Her?"

"Sure! She made a resolution New Year's that she would always think before she spoke, and she has been doing more thinking than she was used to."—Houston Post.

Get Acquainted With the Soil

Grow the best of everything for pleasure and profit. FARM AND RANCH will introduce you and direct you on the road to success.

It tells you how in combination with soil and climate to grow the best of everything—it tells you how to harvest what you grow, and more important still, tells you how to market with greatest profit what you have produced.

It has departments of special interest to each member of the family—father, mother, son, daughter—and each department contains clean, reliable, interesting, instructive, original matter, prepared specially for FARM AND RANCH. No second hand or done over articles printed first in other editions or publications.

No whisky, patent medicine or other injurious, fraudulent or unclean advertisements.

FARM AND RANCH don't claim in the reading matter to be honest and then through its advertising columns lure you into the clutches of those who will rob you of your money, health or character.

Its Correspondents' Department contains specially prepared articles by successful men and women who till the soil and know what they write about.

Its Household Department is edited by a woman of experience and ability, who is assisted by many of the most learned, and able and refined women in the Southwest.

The Children's Department is presided over by a mother, assisted by other mothers who know how to make this department more interesting than any similar department in any other publication. It is not necessary to warn the children not to read the advertisements.

Its Feed and Feed Stuffs Department is conducted by editors who have made the subject a special study; its veterinary department is in charge of leading veterinary surgeons.

That is why the most successful livestock breeders and feeders of the Southwest file each issue of FARM AND RANCH away for future reference. The Editors of every Department are employed because they are known to possess ability and superior knowledge about the topics upon which they are to write.

Its Department of "Farmers' Organizations" is intended to aid in building up organizations run honestly in the interest of actual farmers.

Editorially and every other way its proprietors and editors fight for the right of the producers, and will continue to do so. It has no interest in any other publication or business not in direct line with this policy. FARM AND RANCH is the honest man's friend, the home builder's guide. Every home would be benefited by its weekly visits. It costs nothing to learn all about this great family, farm and stock journal. Why not try it in your home.

Write for free sample copy and home test proposition.

PERSONAL MENTION

If you know it tell it or telephone it to The News. Keep in mind that the reporter is gifted with neither omniscience nor ubiquity.

Ed Brents was in Weleetka last night on official business.

Miss Jess Welch left today for St. Louis to spend the summer.

M. and Mrs. W. A. Guest returned home from a visit to Wynnewood and Sulphur.

Dr. R. D. Love, formerly of North Bend, Oregon, is in the city prospecting for a new location.

W. A. Wimbish of Ardmore, arrived this morning to join his family who are visiting at the home of his brother, Robt. Wimbish.

O. C. White was here from Midland. Jno. H. and J. R. Bufford and W. C. Seabolt of Stratford were in the city last afternoon.

T. H. Gendron, after a seven week's lay off in Ada due to ill health, was able today to resume his duties as traveling salesman.

Judge Joel Terrell came in last night from a ten day's visit with old home folks in Lamar county, Texas. He looks fully recuperated from the strain of his recent successful campaign for county judge.

Preaching tomorrow at the First Presbyterian Church at 11 a. m. Sabbath school at 10 a. m.; Junior Christian Endeavor at 4 p. m.

No night service on account of revival at Methodist church.

Don't forget to be at Roff July 4th. All kinds of amusements, good speaking, plenty to eat, good water, fine shady park. Be sure and see the fire boys' contest at night. The house can't burn, the boys are after the flames.

Gasoline Stove Blew Up.

Mrs. C. M. Chauncey had an exciting experience today with her gasoline cook stove. The thing blew up and damaged a window. She had the bravery to pick up the flaming portion of the stove and throw it out of doors. Fortunately no serious damage resulted.

Church Notice.

A cordial and urgent invitation is given to everybody to attend the services tomorrow at the First Baptist church. The Sunday school meets at 10 a. m.; preaching services at 11 a. m. and 8:15 P. M. Special music at both preaching services. For special reasons the members of the church are urged to be present at the 11 o'clock service. All the singers are urged to be present this evening for choir practice.

T. B. Harrell, Pastor.

Methodist Service.

Bro. T. L. Rippey will preach Sunday at 11:00, again at 3:00, which will be to the children and again at 8:30 p. m. You are invited.

Rained the Fishers Out.

Mayor C. O. Barton, Robt. Kerr, and Geo. Thompson returned Friday night from a five day's fishing excursion over in the Choctaw near Citra.

While they had some pretty good sport and never had to go hungry, it rained on them so much that the trip was by no means a success.

Revival Tent Blown Down.

The big tent in which the Baptist revival is being conducted in North Ada succumbed to the high wind of Friday night. However it was only blown down, not rent.

The tent is again set and the revival goes on under management of pastor G. W. Jefferson. Rev. W. R. Chandler, who began the preaching, had to withdraw from the meeting and has joined his wife at Tecumseh. Bro. Jefferson has secured the services of Rev. C. W. Hampton of Pauls Valley, an able evangelist who is now doing the bulk of the preaching. In spite of the discouraging weather much good is being done in this revival.

It Wasn't a Nice Night.

Friday night was a trying night on those timorous about tornadoes. Beginning about ten o'clock, the elements proceeded to cut up all night long. The lightning flashed and the clouds milled about and the populace clung close to the "frail holes." Yet there has been reported no damage to life, limb or property.

Free Lecture.

Hon. John A. Bright national lecturer for the Improved Order of Redmen will deliver a free lecture on Redman ship at the court house, in Ada, on the evening of June 25, 1907, under the auspices of Geronimo, Tribe No. 18, Improved Order of Redmen. Everybody, the ladies especially, are cordially invited. Come out and hear him and spend a pleasant evening. You will be amply repaid for your trouble. Mr. Bright always sings at the close of his lecture. It is all free.

J. D. Looper,
F. M. Vanlewen,
Committee.

Honor Roll of Pupils.

The following is the roll of honor in Miss Fleeta Smith's school:

Ernest Cassidy, Bailey Lovett, Lillie Perryman, Byrd Chapman, Bertha Cassidy, Clanche Cole, Marvin Cassidy, Annie McDaniel, Blaine Cole, Venas Vaughn, Rubie Ross, Phyllis Steiner, Annie Cutts, Mac Anderson, Luther West, Byron Little, Edith Adams, Mildred Adams, Mildred Steiner, Fred Morris, Loyd Little, Daphne Nichols, Bonzie Coleman, John Chapman, Sadie Moss, Virdie Lowery, Ree Coleman, Pearl Little.

Success in life is accompanied by increase of enemies. That's why Hollister's Rocky Mountain Tea has so many imitators; it's a success. 35 cents, Tea or Tablets. Ramsey's drug store.

Wright and Berry, tailors, next door to postoffice, for high class work. 48-tf

All the children are especially invited to the children's services at 3 p. m.

Ada tailoring and cleaning works east of postoffice. 48-tf

Now It's the Orange Cure.

Young women are this spring devoting themselves to the orange cure. It consists in taking the juice of two oranges three times a day before meals, or after, if it is preferred. Oranges are said to be particularly healthful in the spring, and to give the person who adheres to the regimen a beautiful complexion, better even than that which is supposed to be obtained by eating one raw carrot daily. It surely is a much more desirable remedy.

After the Collision.

He—I beg your pardon. Did I hurt your head?
She (arranging her hair)—No, only my rat.

Advice to Wives.

Nothing is so consoling to a worried man of affairs as to know that he can always find a harbor of refuge in his home.

Hence (advises an observant woman), the wife should seek always to make the home an abode of peace. Her troubles and perplexities should be reserved for discussion when he is comfortable and at leisure, and not sprung upon him the moment he enters the house at the close of his day's work.

Many men fight their way successfully through years of anxious toil only to be broken down at last by the frets and jars of ill-managed households and the incessant gabble of wives who insist on deluging them with their domestic grievances.

While it is said every thing is going up look at our

Ship's Remarkable Voyage.

A remarkable voyage south to Buenos Ayres was made the last part of last year by the barque Strathisla, of Boston, details of which were related the other day, when the barque arrived back at Boston. She started with a cargo of lumber and had nothing eventful happen until September 26, when a hurricane was encountered. The barque was thrown on her beam ends and by a shift of cargo there she stayed and did not right herself for the remainder of the voyage of 4,000 miles. Fortunately she met no more very bad weather and with her heavy list to starboard she made Buenos Ayres in 99 days, a voyage so protracted that the agents feared she was lost.

Implicit Obedience.

The famous Field family, Cyrus and his brothers and sisters, were brought up to obey. The father was a clergyman with \$800 a year for nine children, and frugality and right living were absolutely necessary. Once a useful rat trap was missing. The father gave orders that when it was found it should be brought directly to him. A few days afterward during service, when the sermon was in full swing, there was a clattering up the aisle. It was two of the Field boys carrying the rat trap. They gravely set it down before the pulpit. One of them said simply: "Father, here's your rat trap." Then they turned and went out.

The Motive.

"If Miss Hoamley-Rich wants that fancy of hers to do anything for her she's merely got to command him." "Yes he's like dough in her hands." "Right; you mean he likes the dough in her name."

Notice of Sale.

United States of America, Indian Territory, Southern District, ss:

Whereas, on the 12th day of August, A. D. 1905, to secure the payment of their four promissory notes of that date of the sum of \$22.50 each, payable to the order of Walter B. Paschall, as follows: One February 1st, 1906, one August 1st, 1906, one February 1st, 1907, and one August 1st, 1907, all bearing interest at the rate of 8 per cent per annum from maturity until paid, Robert M. Cummings and Allie B. Cummings, of Ada, Indian Territory, made, executed and delivered to the said Walter B. Paschall a mortgage on the following described property, located in the city of Ada, Chickasaw Nation, Southern District of the Indian Territory, to-wit:

Lot ten (10) and the east half of lot nine (9) of block twelve (12) of Dags Addition to the City of Ada, as shown by the official plat and survey thereof, together with all the improvements thereon and the appurtenances thereunto belonging and.

Whereas, it was especially understood and agreed between the parties

thereto, and so expressed in said mortgage, that in event of default being made in the payment of any one of said notes when due, the said Walter B. Paschall, or the then legal owner and holder of said notes, were given the option and the right to declare all said notes due and payable, and to sell the property, or any part thereof, at public sale to the highest bidder for cash, at the then front Court House door, at Ada, Indian Territory, after giving thirty days notice of the time, place and terms of sale, by publication of notice thereof for thirty days in some newspaper published or of general circulation in said city and Territory, or by printed or written hand bills posted in ten public places in the vicinity of said land, and to apply the proceeds of such sale, first to the payment of all costs, and expenses attending said sale, second to the payment of said debts and interest, and the remainder, if any, to be paid to the said Robert M. Cummings and Allie B. Cummings, their order or assigns, and.

Whereas, the said Robert M. Cummings and Allie B. Cummings failed to pay the second and third of said notes at maturity, or any part thereof, either principal or interest, and the said Walter B. Paschall, the owner and holder of said notes, has therefore, as authorized in said mortgage, declared all said indebtedness due, Now,

Therefore, KNOW ALL MEN BY THESE PRESENTS:

That I, Walter B. Paschall, mortgage aforesaid, for and in consideration and by virtue of the foregoing, will, on Tuesday, the 23rd day of July, A. D. 1907, between the hours of 9 o'clock a. m. and 3 o'clock p. m. at the front door of the Court House of the United States Court, at Ada, Southern District of the Indian Territory, sell to the highest bidder for cash to be paid at said time, all of said property above described, for the purpose authorized by said mortgage which will be free from redemption, appraisement and dower. However, said property will be sold subject to a prior mortgage in favor of the Deming Investment Company given to secure the principal sum of \$300.00 and interest thereon.

Witness my hand on this 22nd day of June, A. D. 1907.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure by local treatment, pronounced it incurable. Science has proved catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials.

THE AMERICAN HOME

W. A. RADFORD
EDITOR

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 194 Fifth Ave., Chicago, Ill., and only enclose two-cent stamp for reply.

It is possible with this plan to build a good sensible, stylish house for a small amount of money because the arrangement is so economical. It is a little more than a cottage in height, yet the plan is so complete that three good square bedrooms with bathroom and plenty of closets are worked in close under the roof in the second story.

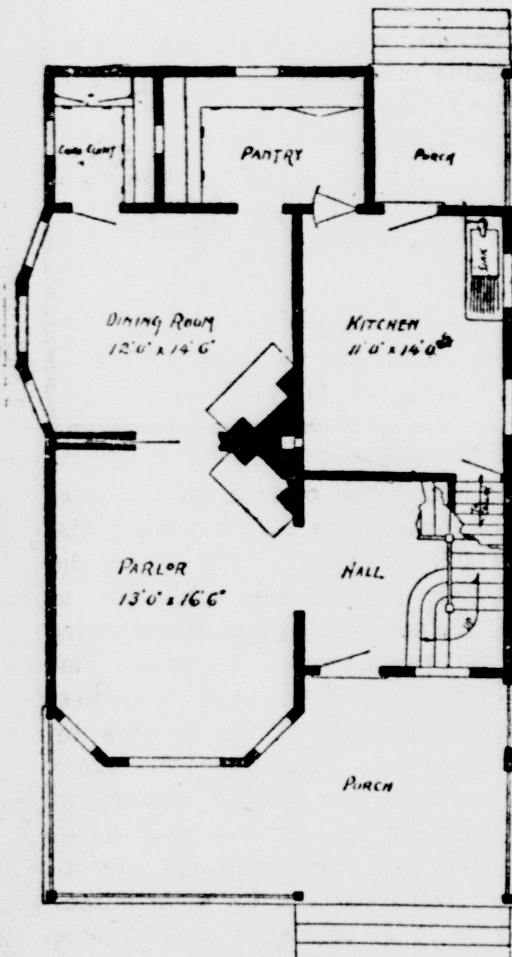

I never knew a woman to have closet room enough except in some plan like this. Builders haven't sufficient nerve to work good space into closets or store rooms, but when they catch a roof proposition like this they just love to take advantage of the situation and arrange closets and cubby-holes in every corner possible.

Probably six rooms with the minor conveniences were never worked into a house of this size to better advantage. The size on the ground is 27 by 38 feet, exclusive of porches, and this is not a very liberal allowance. The high price of building materials has caused architects to sit up nights to invent new combinations that will give the necessary room and comfort for a small outlay in money. It makes a great difference in building whether you pay \$15 per thousand for lumber or whether you pay \$60. It takes just as many shingles at \$7 as it used to take at \$2.50, and I don't see that they turn the water any better. They come high now but we must have them the same as of old, and it is poor economy to try to stretch them. If a shingle don't catch three joints the time will come before long when the roof will fail to do its duty as an honest roof should.

A great deal depends on the roof.

has considerable responsibility in rainy weather. I have seen costly decorations badly demoralized through no fault of their own, but simply because the roof got tired of shedding water. My advice to a man putting up a house to live in is to pay particular attention to the roof. After the shingles are all nailed on it is a comfortable feeling to realize that the roof over your head is there for bus-

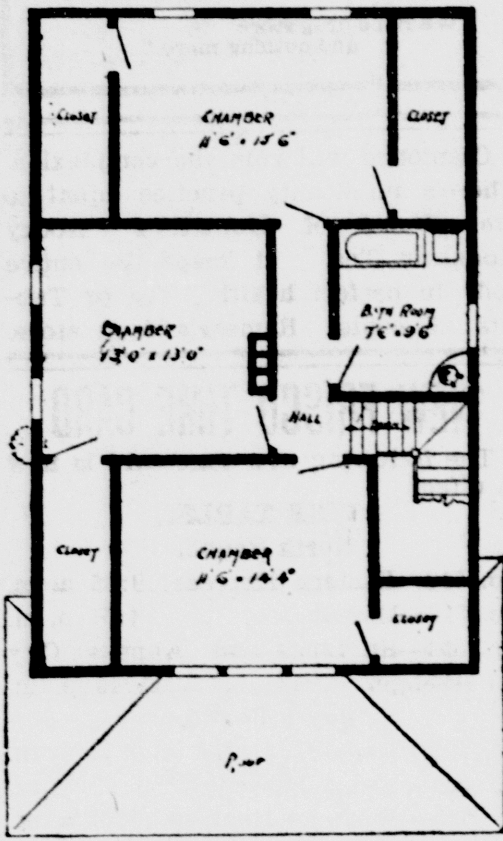

FIRST FLOOR PLAN.

iness and that it is so thoroughly well nailed that the wind won't coax the shingles out of order, or the sun induce them to curl up in dry weather. A good roof does not depend entirely on materials from which it is made. The pitch, kind of gutters and general shape of the roof has as much to do with it as the quality of shingles or placing of the sheathing.

There is another economy in this

design and that is the way the chimney is built. It is placed in the center of the house where it answers for kitchen range, furnace and for both grates. When you are building a chimney it costs but little more to build it large enough for three or four flues. There is another advantage in placing the chimney in the center of the house and that is where it goes through the roof. It is easy to prevent

SECOND FLOOR PLAN.

leakage around the chimney at the peak because no water accumulates at that point. When you put a chimney through a roof down near the eaves the water from a heavy shower makes a rush for it from the peak down. By the time it reaches the chimney there is considerable accumulation and the first thing you know it is pouring into the room below along somewhere in the middle of the night when you

would rather not be bothered with matters of that kind, but your wife will insist that you give it your immediate attention regardless of the weather.

There is still another advantage in putting the chimney in the middle of the house. Sometimes outside chimneys fail to draw satisfactorily because the flues will not warm up. You can't get a good lively current of air to climb up through a cold chimney but when you have it surrounded as this chimney is you can keep in a good, comfortable frame of mind even in the coldest weather. Most people object to a chimney that won't draw.

A splendid feature about this house plan is the kitchen and pantry. They are both roomy and they are both light and airy. It makes no difference what materials cost if we want comfort in the house we must have a good commissary department with storage for dishes and storage for eatables. When you have a kitchen 11 by 14 feet shut off from the rest of the house, but easily accessible through double pantry doors and when such a kitchen is provided with two large, cheerful windows and a door opening out onto a pleasant back porch with an easy entrance to the cellar and running water at the sink you have about everything that you can get in a kitchen. Of course, it is understood that the kitchen is furnished with a good range with hot and cold water and a hardwood floor, good wainscoting and the walls decorated in some light, attractive colors.

These are little things but we cannot leave them out and satisfy the women folks and we must remember that the women are the ones to be pleased when it comes to the house, and especially the kitchen end of the house because that is where they spend a great deal of time and where they do a great amount of hard work principally for our comfort and good health.

Delicacy of Beauty.

Beauty is a metal so delicate that the slightest breath of ill nature will tarnish it.

THE ARMY WORM AND ITS METHOD OF WORK

In Large Numbers They Are Exceedingly Destructive to Vegetation, and Even Trees.

There are many worms that are called army worms, and it is therefore necessary to distinguish between them. In a report issued last December the Minnesota station called attention to the injury this worm is doing to timothy meadows. It was predicted that the coming season will show still greater damage.

This is one of the cut worms, and it is found in such numbers some seasons that it is known as the "army worm" in certain localities. Its life history is similar to the other cut worms. The female moth lays about 500 eggs on blades of grass, placing 15 or 20 or more on each blade of grass. These eggs hatch in from six to ten days and the minute larvae begin at once to attack the grass on which they are born. Frequently a farmer will see the effect of their work without being aware of their presence. They attack not only grasses but the cereals and corn. Occasionally they attack the foliage of the apple tree.

It takes the worms about from one

"The most effective method of combating the army worm is ditching. If two or more furrows be turned up with a plow between the advancing army and the crop which it threatens, the steep side of the furrow being towards the crop, the worms tend to congregate therein, brought to a stop by the wall of dirt. These furrows should be about two feet or more apart.

"It is better yet, if time and labor are available, to dig a ditch next the crop that is in danger, since it is harder for them to extricate themselves from a ditch than from a furrow. Several furrows will, however, check them till they can be killed. Killing can be accomplished by putting dry straw on the worms in the furrow and hurriedly firing it, after wetting it slightly with kerosene. Or kerosene may be poured directly on the worms. This in itself is fatal, but very expensive.

"Crushing the worms when in the ditch or furrow by dragging a small log or piece of timber through it is

The Army Worm, Larvae and Moth.

to two months to reach their full size, and at that time they are about one and one-fourth inches long. They are characterized by four broad stripes on each side, the two upper ones being brighter than those below. When the caterpillar has obtained its full size it works its way an inch or more into the ground, where it undergoes transformation. The moths do not emerge from their pupal state till the next summer.

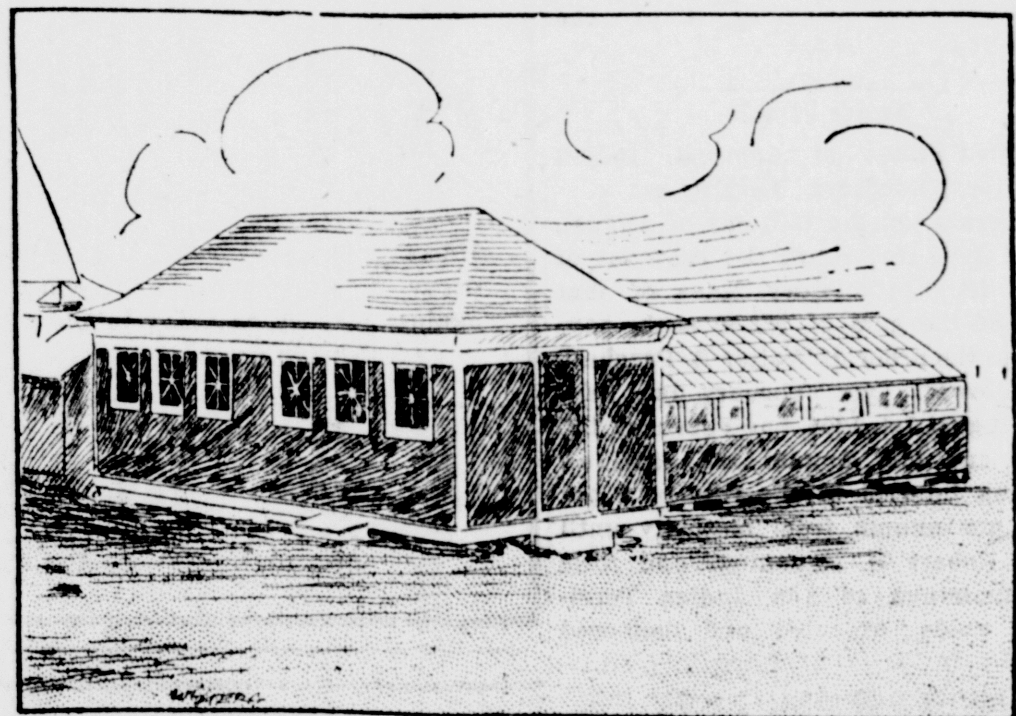

The Minnesota station says of them: "In their marches, it is asserted, the caterpillars will sometimes destroy young fields of flax by biting off portions of the plants without utilizing them for food."

Bulletin 100 of the Minnesota station advises the following treatment:

practiced by some. Fall plowing (as late as possible), as in the case of many other of our insect pests, is excellent, as it exposes many of the pupae, where birds can find them, and variations in the weather can affect them. Sometimes the deep plowing buries them so deeply that the moths cannot emerge from the soil.

"Some spread dry straw on them when on their food plants and fire it, thus burning them and saving them attacking a nearby crop which would otherwise have suffered. Inasmuch as the vicinity of old straw stacks offers an ideal place for hibernation, such rubbish, which is also a haven of refuge for other pests as well, should not be allowed to stand undisturbed for any length of time."

Insectary at the Minnesota Experiment Station

This building makes possible the study of insect life at any time of the year, thus enabling the entomologist

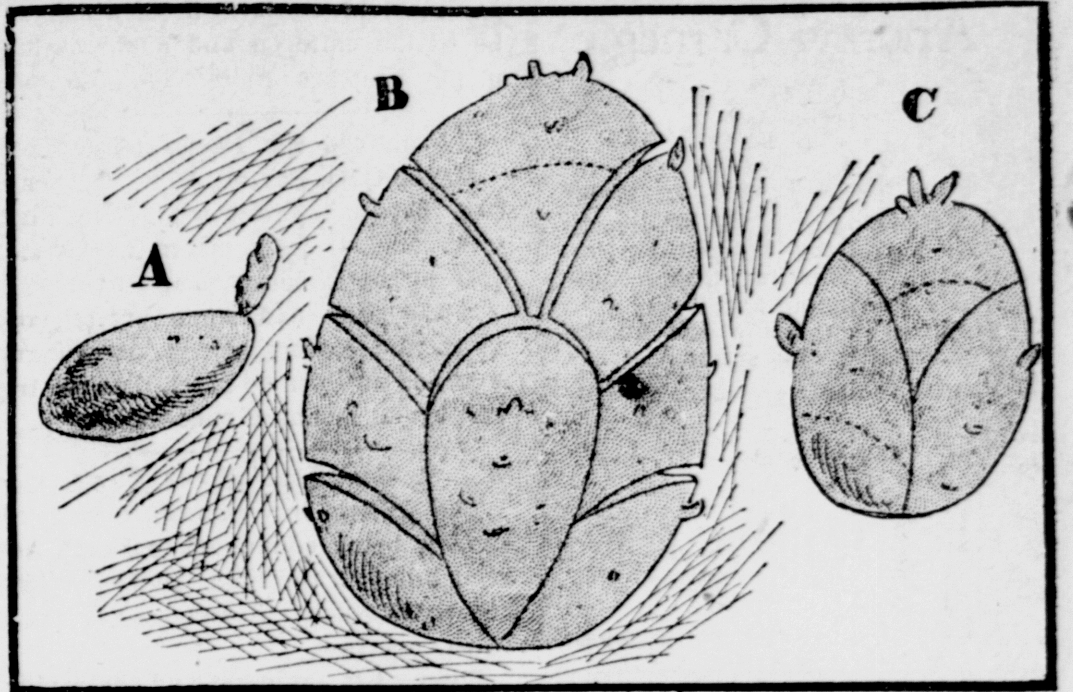

to make the most economical use of his time, and thus accomplishing the best results.

Cultivation of Corn.—The first cultivation should be close to the hill, but as the corn grows the shovels should be set farther from the hill to avoid injuring the roots. It is through the roots that the food which makes a large part of the ear is taken and if the

roots are cut off, it is reasonable to suppose that the formation of ear will be but half as large.

The Toothless Hen.—Make the same use of the toothless hen as you do of the garden sassa.

How Seed Potatoes Are Cut Into Sets

In the largest specimen the cuts are downward direction to give best support to the sprouts.

AN ODE TO A SPRING LAMB

He buys old ewes when the market's low, And pays the freight from South Omaha, Listen to the sheepman talk.

He feeds them up on alfalfa hay And gives them corn three times a day, Listen to the sheepman talk.

When they are fat and ready to ship, He writes to the salesman to give him a tip, Listen to the sheepman talk.

He puts his sheep in a double-deck freight, And back to Omaha sends them straight, Listen to the sheepman talk.

When they get there they are put in a pen And fed on hay till they're full again, Listen to the salesman talk.

He says they were shipped right off the range, He talks 'till the packer puts down the change, Listen to the salesman talk.

The sheep take a turn through the packer's den, And are ready for sale to the market-men, Listen to the packers talk.

Then they are hung on the butcher's hook, And offered for sale to the freckle-faced cook, Listen to the butcher talk.

He says they are young, and juicy and sweet, Says for a king they would make a treat, Listen to the butcher talk.

She buys a leg o' mutton and puts it on to cook, But it won't cook through by hook or crook, Listen to the servant scold.

The husband comes home at noon to dine, She serves up the roast so brown and fine, Listen to the housewife brag.

"What in hades do you call this meat?" He shrieks at her in a temper heat, Listen to the husband yell.

"It's old and it's tough and it's dry as snuff, Where did you get the measly stuff?" Listen to the fiendish man.

"I bought it to-day of the marketman; He said 'twas a nice, little fat spring lamb," Listen to the housewife's plea.

"A lamb it was in the days of yore, 'Twill never see ten and a score any more," Listen to the horrid man.

"I say it was one that Noah had," Then he said words that were awful bad— Listen to the husband swear.

But the sheepman smiled as he took his cash, And bought a dinner of 20-cent hash, And listened to the waiter girl talk.

He put on his hat and did up the town, Like the leg o' mutton he did it up brown, Listen to his gleeful talk.

He fattened those ewes in his own good day, But not to eat, he's not built that way, Listen to the sheepman laugh. —CHARLOTTE WHITNEY.

THE ESSENTIAL TO FARM FERTILITY

By H. R. Smith, of Nebraska Experiment Station.

The maintenance of a high degree of soil fertility is a fundamental principle in successful farming. Had this been recognized years ago and methods practiced that build rather than deplete, much of the native fertility of our eastern soils would have been conserved. Live stock in the state of Ohio began to decline in number 30 years ago and with that decline there occurred almost immediately decline in the average yield per acre of wheat and other small grains. That state now purchases annually \$2,000,000 worth of commercial fertilizers. What has been the experience of Ohio is the experience of many other eastern states where grain growing without rotation with hay plants is now practiced.

The growing of such legumes as alfalfa, clover and cow peas, and the

feeding of these crops with at least a part of the grain grown, is our surest preventive of soil improvement. It goes without saying that this can only be accomplished by keeping the stock on the farm. If by feeding farm animals no more than elevator prices are received for the crops grown there is still abundant reason for the practice of such system of farming. Many do not feed stock because they are fearful that grain thus disposed of will sell at a sacrifice. No doubt this is true, if carelessness is displayed in the feeding and management. With the exercise of skill the opposite is just as true.

Each year as the results of experiments are compiled and the work of other stations reviewed new proof is added to the fact that a careful system of feeding in which nature's laws are given recognition is capable of producing to a marked degree larger and more profitable gains than indiscriminate feeding. It has been proved beyond a doubt that the cost of producing grains may be reduced from 20 to 30 per cent. by properly compounding rations. Such evidence is forthcoming from all stations of the middle west, where feeding questions have been given most consideration. Should a farmer lose by disease one animal out of every five he would feel much unconcerned. The equivalent of this is happening on many farms to-day through injudicious feeding.

If stock feeding is to be conducted with profit there must be put into the work a high order of intelligence. How can it be otherwise? The feeder is in constant touch with nature's laws, which must not be ignored. He is dealing with a wide range of foods, differing essentially in physical character, in composition and digestibility. He is furthermore dealing with an animal mechanism infinitely more complex in the arrangement of parts and the performance of functions than anything ever wrought by man. If all foods and all classes of animals were alike the problem would be a simple one. If all foods consisted of the natural herbage, which at one time grew uncultivated, animals would get for themselves more nearly what the system requires. But the artificial propagation of numerous forms of food (some kinds produce in greater abundance than others) has made the economical utilization of such foods a complex science. Nor can profitable stock feeding be looked upon as a science merely. It is a business, too, in the sense that one who is engaged in the work is each year confronted with a change in prices on foods, which compels him to keep posted on market quotations in order to be able to select those which go farthest for the money. Why should not the stock farmer give just as much study and preparation to his business and profession as does the lawyer, physician or engineer? As our population increases and land becomes higher in price this is constantly becoming more imperative.

DESIRABLE FEATURES OF A SEPARATOR

By Prof. E. H. Van Norman.

Some of the desirable features of a separator are:

1. Clean skimming under a wide range of conditions, such as warm and cold milk, and thick or thin cream. The skim milk from a good separator properly run should not contain to exceed one-twentieth of one per cent. of fat, and under ordinarily favorable conditions should show even less than that in the double neck test bottle.
2. Ease of washing; all parts should be so arranged as to be easily gotten at for washing—few corners and tubes.
3. Easy running. All machines of the same manufacture are not equally easy running.
4. Durable construction.

In Destroying Weeds.—In combating any plant or grass which has become a weed, it should be remembered that it is necessary for any vegetable life to have a leaf system above the ground before it can live. If this is destroyed, there will be no plant. If the leaves are kept from appearing above the ground, it will not be long all the weed or grass pest is overcome.

Use Only Fresh Eggs.—Don't expect the incubator or the settin' hen to hatch ancient eggs. An egg begins to deteriorate as soon as laid. Like the hen that laid it, it doesn't improve with age.

Oil Burners on Frisco.

Muskogee, I. T. June 22.—After testing the crude oil obtained in the Cherokee oil fields in the engines of the Frisco Railroad Company, in the place of coal, Frisco officials declare it is a pronounced success, and is in many ways far superior to coal. Oil is now being burned in the engines of this road out of Kansas City as far south as Springfield. The first test of the new fuel was made in passenger engines two weeks ago, and since that time not a pound of coal has been used. The road has been burning oil in its switch engines near Sulphur for two years.

New Frisco Superintendent.

Denison, Texas, June 22.—A. J. Giger, formerly with the operating department of the Colorado and Southern, has been appointed superintendent of the Red River division of the Frisco, with headquarters at Francis, I. T., vice, J. W. Walton, who resigned to succeed A. D. Birchard as superintendent of transportation and car service for the Katy, with headquarters in Denison.

Sure!

With Hoff and Ada prospecting for oil and gas and Fitzhugh after zinc and lead, it's only a matter of time till Pontotoc will be among the banner mineral producing counties of the new state—Roff Engle.

Mr. Hamilton Here.

J. A. Hamilton, vice president of the Ada Electric and Gas company, is here from Marissa, Ill., both on business and pleasure bent. His company is naturally interested in the electric railway project described in Friday's News.

Something Needed Portland Park Addition

Lots near the big Cement Plant to accommodate the hundreds of laborers to be employed in this great industry. This need has been met by laying out the Portland Park Addition just west of the cement plant. Lots are 30 feet by 140, with 60-foot streets and 20-foot alleys. Prices of lots are from \$20 to \$30. Terms, \$5 down and \$2 per month. A large reservoir is to be built on the north side by the cement company which will afford boating and fishing.

The Title is Perfect and the Location Slightly and Healthful.
Get on Easy Street by Buying Lots in Portland Park.
Homes in the Reach of All in Portland Park Addition.
Plant your Money in Portland Park and let it Grow.

Real Estate is the foundation of wealth—it's safe and sure. Get in on the ground floor at Portland Park

Only room for 80 families in Portland Park while hundreds will be needed. This is the only land that will be available for years.
Have you seen Ada lots advance one hundred and even one thousand per cent, while you waited to see what the town would do? Take a tumble to yourself and buy lots in Portland Park. These lots are being sold at half their real value and on terms within the reach of all.

REPUBLICANS ARE REVOLTING

Want the Constitution and Statehood--Threaten to Overthrow Leaders Who are Trying to Commit Party to Contrary Attitude

Tulsa, I. T. June 22.—The announcement was made today by Judge Clarence L. Leeds, a prominent Indian Territory republican leader, that unless the republican state committee ceases to fight upon the constitution for Oklahoma by July 1, a mass meeting of the two Territories will be called in Tulsa to arrange for holding a state convention independent of the action of the state committee. The mass meeting will declare for immediate statehood, support of the constitution, and will pledge the republican party to amend the objectionable features of the constitution either by legislative act or by the initiative and referendum. The movement is backed by William Johnson of Bartlesville, a member of the republican state committee; Col. George Murphy of Muskogee; Col. William Busby of South McAlester and Henry P. Robbins of South McAlester, and it is said to have the endorsement of Judge W. G. Raymond, the republican leader of Muskogee.

STATE CLOSES ITS CASES

Court Overrules Haywood's Motion to Dismiss--Defense Must Produce Its Evidence--Adjournment Till Monday.

Boise, Idaho, June 21.—When the state today closes its case against William D. Haywood, charged with the murder of Frank Steunberg, the defense made an unsuccessful attempt to secure from the court an order directing the jury to acquit the prisoner. Judge Wood's ruling, which requires the defense to meet with evidence the case which the state has presented was made at 5:15 o'clock and it was then arranged that Haywood's counsel should make their opening statement and present their first testimony on Monday next.

When the trial opened this morning it was stipulated that the record should show the record of the draft sent by Haywood to Jack Simpkins late in 1905 was Dec. 21, and after that prosecution proceeded to show by a handwriting expert that George Pettibole, using the name of "J. Wolf" and of "P. Bone," made two remittances of money to Harry Orchard at San Francisco through the Pacific Postal Telegraph Company in the fall of 1904.

The state next called Jim Seathorn, a colored horse trader, who swore that he sold a horse and buggy to Orchard in Denver, 1905, and identified Haywood as one of the men who rode with Orchard.

After that the defense admitted that in June, 1905, Haywood sent \$75 to Steve Adams at Ogden, and when the necessary showing had been made on the record, the prosecution formally rested.

The motion for an instruction to the jury to acquit was by agreement presented at the afternoon session and the jury was sent back to the jury house out of hearing of the argument.

Attorney E. F. Richardson made the principal argument in support of the motion, in a long, carefully prepared and eloquent address.

He took for his guide the Idaho statute which forbids conviction upon the uncorroborated testimony of an accomplice and, quoting many authorities in support of his contention that there must be convincing corroboration entirely independent of the testimony of the accomplice, made an analysis of all the testimony offered. He declared that none of the testimony could stand without support or Orchard's story and that the statute specifically forbids its acceptance under these circumstances.

He also argued that the testimony of Orchard was the only showing that in any way connected Haywood with the crime and that the statute forbids conviction under those circumstances. Senator Horah, who also spoke for the state, argued with like force and eloquence that Haywood's connection had been independently shown and that Orchard's testimony had been corroborated by independent circumstances and evidence. He also submitted a general argument to show that the state had established the existence of a general conspiracy in which Haywood was a participant and in which he strongly developed the alleged participation and connection of Simpkins.

Clarence Darrow, who closed, pleaded that there was not a shred of evidence in the case capable of standing without the "rotten thread of Orchard's story" to sustain it, and that the plain provision of the Idaho statute made the duty of the court clear. He ridiculed the idea of general conspiracy and contended that if the most liberal allowances were made for the entire showing of the state that it would not make out a case against the prisoner worthy of submission to the jury.

Public Installation.

The order of the Eastern Star will have an elaborate function in the hall Saturday evening, June 29, to which the public is cordially invited.

The new officers will be installed and toothsome refreshments will be served. The Eastern Star has an enviable reputation for doing things

"handsome," and doubtless the hall will be full of visitors.

It Took a Ride.

Geo. Redding, living about eight miles southwest, was in town one day last week for the purpose of ordering a buggy wheel. A week ago a miniature cyclone entered into his place, kicked his smokehouse to pieces, tore down his buggy shed, hoisted his new buggy into the air, climbed into it and rode about 200 yards and placed it gently back on the ground. Before leaving it it tore every spoke out of one wheel, twisted the tire and buggy was uninjured. Untamed cyclones are dangerous animals.—Roff Eagle.

Indian Ball Games.

Senator Amos Hays, F. M. Hudson and Col. Gus Angely were in town today having printed some posters advertising Indian ball games between full blood Choctaws and Chickasaws.

They have gathered a big bunch of players from the surrounding country and will make a tour over the east, including Eureka Springs, Ark. The games will be played with all the marvelous skill and in all the picturesque which characterized the sport as engaged in by the aborigines centuries ago.

WHERE WAS THE CAT?

Admitting the Meat Owner Wanted to Be Shown Feline

A certain family living in one of the suburbs of New York owned a kitten of which they were very fond. When they went away for the summer it was decided after various consultations to leave the kitten with the butcher on condition that he should treat it with the greatest kindness and give it about a pound of meat a week besides its daily allotment of cream. Some weeks after the family had closed the house for the summer the nominal head of the family visited the suburb to attend to some business matters and decided that he might as well drop in at the butcher's to see how the kitten was getting along.

He found the kitten curled up in a corner asleep and apparently at peace with the world but far from being sleek or well fed in appearance. It was so thin that he felt constrained to call the attention of the butcher to the fact.

Do you mean to say you have fed that cat a pound of meat during the last week? he asked.

I certainly have responded the butcher.

Put him on the scales and see how much he weighs.

The butcher did as requested and gently deposited the kitten in the balance. The pointer indicated exactly one pound.

Well granted the owner of the animal there's the pound of meat all right but where's the cat?

TREES THAT ARE A MYSTERY

One a Vegetable Freak and the Other a Greedy Monopolist

California has one tree which is the personification of mystery. I find no where else in the world it has a mysterious origin and thrives in a region of mystery.

The Mojave yucca is a vegetable freak which has developed into a species. It has the characteristics of several plants to which no relationship can be traced.

It is an endogen yet its bark shows concentric rings such as characterize the exogenous stems. It lives and thrives in great numbers in a region early level of vegetation in a land of heat and thirst and barrenness.

Another tree in California which has a peculiar personality is the creeping oak of Monterey.

Nowhere in the vegetable kingdom can be found so true a representative of man. This tree is of fairly growth its limbs like those of the steers bending and twisting in all directions.

Wherever a branch touches the earth it takes root and becomes as it were another trunk though still a branch of the main stem drawing nourishment both from the parent stem and from the new source. In this manner the tree is spread till it has taken possession of five acres of ground and it is still advancing.

Something of a Talker.

Jobbins wife has nervous prostration.

What caused it?

Too much brain work.

"Brain work" Her?

Sure! She made a resolution New Years that she would always think before she spoke and she has been doing more thinking than she was used to. —Houston Post

Get Acquainted With the Soil

Grow the best of everything for pleasure and profit. FARM AND RANCH will introduce you and direct you on the road to success.

It tells you how in combination with soil and climate to grow the best of everything—it tells you how to harvest what you grow and more important still, it tells you how to market with greatest profit what you have produced.

It has departments of special interest to each member of the family—father, mother, son, daughter—and each department contains clear, reliable, interesting, instructive, original matter prepared especially for FARM AND RANCH. No second hand or done over articles printed first in other editions or publications.

No whisky patent medicine or other injurious fraudulent or unclean advertisements.

FARM AND RANCH don't claim in the reading matter to be honest and then through its advertising columns lure you into the clutches of those who will rob you of your money, health or character.

Its Correspondents' Department contains specially prepared articles by successful men and women who tell the soil and know what they write about.

Its Household Department is edited by a woman of experience and ability who is assisted by many of the most learned and reliable and able and reliable women in the Southwest.

The Children's Department is presided over by a mother, assisted by other mothers who know how to make this department more interesting than any similar department in any other publication. It is not necessary to warn the children not to read the advertisements.

Its Feed and Feed Stuffs Department is conducted by editors who have made the subject a special study. Its veterinary department is in charge of leading veterinary surgeons.

That is why the most successful livestock breeders and feeders of the Southwest file each issue of FARM AND RANCH away for future reference. The Editors of every Department are employed because they are known to possess ability and superior knowledge about the topics upon which they are to write.

Its Department of "Farmers' Organizations" is intended to aid in building up organizations run honestly in the interest of actual farmers.

Editorially and every other way its proprietors and editors fight for the right of the producers, and will continue to do so. It has no interest in any other publication or business not in direct line with this policy. FARM AND RANCH is the honest man's friend, the home builder's guide. Every home would be benefited by its weekly visits. It costs nothing to learn all about this great family farm and stock journal. Why not try it in your home?

Write for free sample copy and home test proposition. FARM AND RANCH PUB. CO., Dallas, Texas.

PERSONAL MENTION

If you know it tell it or telephone it to The News. Keep in mind that the reporter is gifted with neither omniscience nor ubiquity.

Ed Breuts was in Weleetka last night on official business.

Miss Jess Welch left today for St. Louis to spend the summer.

M. and Mrs. W. A. Guest returned home from a visit to Wynnewood and Sulphur.

Dr. R. D. Love, formerly of North Bend, Oregon, is in the city prospecting for a new location.

W. A. Wimbish of Ardmore, arrived this morning to join his family who are visiting at the home of his brother, Robt. Wimbish.

O. C. White was here from Midland, Jno. H. and J. R. Bufford and W. C. Seabolt of Stratford were in the city last afternoon.

T. H. Gendron, after a seven week's lay off in Ada due to ill health, was able today to resume his duties as traveling salesman.

Judge Joel Terrell came in last night from a ten day's visit with old home folks in Lamar county, Texas. He looks fully recuperated from the strain of his recent successful campaign for county judge.

Preaching tomorrow at the First Presbyterian Church at 11 a. m. Sabbath school at 10 a. m.; Junior Christian Endeavor at 1 p. m.

No night service on account of revival at Methodist church.

Don't forget to be at Roff July 4th. All kinds of amusements, good speaking, plenty to eat, good water, fine shady park. Be sure and see the fire boys' contest at night. The house can't burn, the boys are after the flames.

Gasoline Stove Blew Up.

Mrs. C. M. Chauncey had an exciting experience today with her gasoline cook stove. The thing blew up and damaged a window. She had the bravery to pick up the flaming portion of the stove and throw it out of doors. Fortunately no serious damage resulted.

Church Notice.

A cordial and urgent invitation is given to everybody to attend the services tomorrow at the First Baptist church. The Sunday school meets at 10 a. m.; preaching services at 11 a. m. and 8:15 P. M. Special music at both preaching services. For special reasons the members of the church are urged to be present at the 11 o'clock service. All the singers are urged to be present this evening for choir practice.

T. B. Harrell, Pastor.

Methodist Service.

Bro. T. L. Rippey will preach Sunday at 11:00, again at 3:00, which will be to the children and again at 8:30 p. m. You are invited.

Rained the Fishers Out.

Mayor C. O. Burton, Robt. Kerr, and Geo. Thompson returned Friday night from a five day's fishing excursion over in the Choctaw near Citra.

While they had some pretty good sport and never had to go hungry, it rained on them so much that the trip was by no means a success.

Revival Tent Blown Down.

The big tent in which the Baptist revival is being conducted in North Ada succumbed to the high wind of Friday night. However it was only blown down, not rent.

The tent is again set and the revival goes on under management of pastor G. W. Jefferson. Rev. W. R. Chandler, who began the preaching, had to withdraw from the meeting and has joined his wife at Tecumseh. Bro. Jefferson has secured the services of Rev. C. W. Hampton of Pauls Valley, an able evangelist who is now doing the bulk of the preaching. In spite of the discouraging weather much good is being done in this revival.

It Wasn't a Nice Night.

Friday night was a trying night on those timorous about tornadoes. Beginning about ten o'clock, the elements proceeded to cut up all night long. The lightning flashed and the clouds rilled about and the populace clung close to the "frail holes". Yet there has been reported no damage to life, limb or property.

Free Lecture.

Hon. John A. Bright national lecturer for the Improved Order of Redmen will deliver a free lecture on Redman ship at the court house, in Ada, on the evening of June 23, 1907, under the auspices of Geromino, Tribe No. 18, Improved Order of Redmen. Everybody, the ladies especially, are cordially invited. Come out and hear him and spend a pleasant evening. You will be amply repaid for your trouble. Mr. Bright always smokes at the close of his lecture. It is all free.

J. D. Looper.

F. M. Vanlewen.

Committee.

Honor Roll of Pupils.

The following is the roll of honor in Miss Fleetta Smith's school:

Ernest Cassidy, Bailey Lovett, Little Perryman, Byrd Chapman, Bertha Cassidy, Clanche Cole, Marvin Cassidy, Annie McDaniel, Blaine Cole, Venus Vaughn, Rubie Ross, Phyllis Steiner, Annie Cuts, Mac Anderson, Luther West, Byron Little, Edith Adams, Mildred Adams, Mildred Steiner, Fred Morris, Loyd Little, Daphne Nichols, Bonzie Coleman, John Chapman, Sadie Moss, Virde Lowery, Ree Coleman, Pearl Little.

Success in life is accompanied by increase of enemies. That's why Hollister's Rocky Mountain Tea has so many imitators; it's a success. 35 cents, Tea or Tablets. Ramsey's drug store.

Wright and Berry, tailors, next door to postoffice, for high class work. 43-44

All the children are especially invited to the children's services at 3 p. m.

Ada tailoring and cleaning works east of postoffice. 48-49

Now It's the Orange Cure.

Young women are this spring devoting themselves to the orange cure. It consists in taking the juice of two oranges three times a day before meals, or after, if it is preferred. Oranges are said to be particularly healthful in the spring, and to give the person who adheres to the regimen a beautiful complexion, better even than that which is supposed to be obtained by eating one raw carrot daily. It surely is a much more desirable remedy.

After the Collision.

He—I beg your pardon. Did I hurt you head?
She (arranging her hair)—No, only my rat.

Advice to Wives.

Nothing is so consoling to a worried man of affairs as to know that he can always find a harbor of refuge in his home.

Hence (advises an observant woman), the wife should seek always to make the home an abode of peace. Her troubles and perplexities should be reserved for discussion when he is comfortable and at leisure, and not sprung upon him the moment he enters the house at the close of his day's work.

Many men fight their way successfully through years of anxious toil only to be broken down at last by the frets and jars of ill-managed households and the incessant gabble of wives who insist on deluging them with their domestic grievances.

While it is said every thing is going up look at our

Ship's Remarkable Voyage.

A remarkable voyage south to Buenos Ayres was made the last part of last year by the barque Strathgairn, of Boston, details of which were related the other day, when the on no arrived back at Boston. She started with a cargo of lumber and had not long eventful happen until September 26, when a hurricane was encountered. The barque was thrown on her beam ends and by a shift of current she stayed and did not return herself for the remainder of the voyage of 4,000 miles. Fortunately she lost no more very bad weather and with her heavy list to starboard she made Buenos Ayres in 49 days. Voyage so protracted that the crew feared she was lost.

Implicit Obedience.

The famous Field family, Cyres and his brothers and sisters, was brought up to obey. The father was a clergyman with \$500 a year in salary, and frugality and right living were absolutely necessary. On a useful rat trap was missing. The father gave orders that when it was found it should be brought directly to him. A few days afterward during service, when the sermon was in full swing, there was a clattering up the aisle. It was two of the Field boys carrying the rat trap. They gravely set it down before the pulpit. One of them said simply: "Father, here's your rat trap." Then they turned and went out.

The Motive.

"If Miss Roanley-Rich wants that cake out hers to do anything for her I'll help her get to command him." "You mean he likes the cake in her name."

Notice of Sale.

United States of America, Indian Territory, Southern District, ss:

Whereas, on the 12th day of August, A. D. 1905, to secure the payment of their four promissory notes of that date of the sum of \$23.50 each, payable to the order of Walter B. Paschall, as follows: One February 1st, 1906, one August 1st, 1906, one February 1st, 1907, and one August 1st, 1907, all bearing interest at the rate of 8 per cent per annum from maturity until paid, Robert M. Cummings and Allie B. Cummings, of Ada, Indian Territory, made, executed and delivered to the said Walter B. Paschall a mortgage on the following described property, located in the city of Ada, Chickasaw Nation, Southern District of the Indian Territory, to-wit:

Lot ten (10) and the east half of lot nine (9) of block twelve (12) of Dags Addition to the City of Ada, as shown by the official plat and survey thereof, together with all the improvements thereon and the appurtenances thereunto belonging and.

Whereas, it was especially understood and agreed between the parties

FOR SALE—By O. B. Weaver improved and unimproved, both business and residence property, at a "hard up" bargain.

thereto, and so expressed in said mortgage, that in event of default being made in the payment of any one of said notes when due, the said Walter B. Paschall, or the then legal owner and holder of said notes, were given the option and the right to declare all said notes due and payable, and to sell the property, or any part thereof, at public sale to the highest bidder for cash, at the then front Court House door, at Ada, Indian Territory, after giving thirty days notice of the time, place and terms of sale, by publication of notice thereof for thirty days in some newspaper published or of general circulation in said city and Territory, or by printed or written hand bills posted in ten public places in the vicinity of said land, and to apply the proceeds of such sale, first to the payment of all costs, and expenses attending said sale, second to the payment of said debts and interest, and the remainder, if any, to be paid to the said Robert M. Cummings and Allie B. Cummings, their order or assigns, and.

Whereas, the said Robert M. Cummings and Allie B. Cummings failed to pay the second and third of said notes at maturity, or any part thereof, either principal or interest, and the said Walter B. Paschall, the owner and holder of said notes, has therefore, as authorized in said mortgage, declared all said indebtedness due, Now,

Therefore, KNOW ALL MEN BY THESE PRESENTS:

That I, Walter B. Paschall, mortgagee aforesaid, for and in consideration and by virtue of the foregoing, will, on Tuesday, the 23rd day of July, A. D. 1907, between the hours of 9 o'clock a. m. and 2 o'clock p. m. at the front door of the Court House of the United States Court, at Ada, Southern District of the Indian Territory, sell to the highest bidder for cash to be paid at said time, all of said property above described, for the purpose authorized by said mortgage which will be free from redemption, appraisement and dower. However, said property will be sold subject to a prior mortgage in favor of the Denning Investment Company given to secure the principal sum of \$300.00 and interest thereon.

Witness my hand on this 22nd day of June, A. D. 1907.

Walter B. Paschall, Mortgagee.

First published June 22nd, 1907. 80-11. D-47.

Are You Insured?

IF NOT, WHY NOT?

Hicks predicts tornadoes during the summer and fires are liable to occur at any time. Therefore you had better prepare yourself against loss by insuring in old reliable companies.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure by local treatment, pronounced it incurable. Science has proved catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials.
Address: F. J. Cheney & Co., Toledo, Ohio.
Sold by Druggists, 75c.
Takes Hall's Family pills for Constipation.

EDITOR

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer he is without doubt the highest authority on all subjects. Write to all inquiries to William A. Radford, No. 194 Fifth Avenue, New York City. Send only one cent for each stamp for reply.

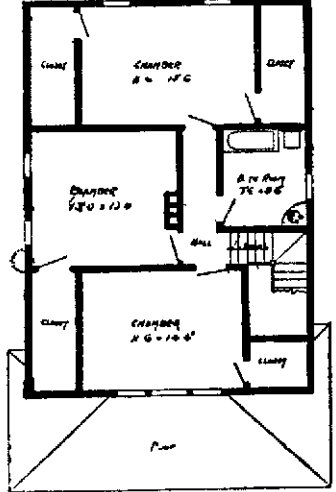

It is possible with this plan to build a good sensible stylish house for a small amount of money because the arrangement is so economical. It is a little more than a cottage in height yet the plan is so complete that three good square bedrooms with bathroom and plenty of closets are worked in close under the roof in the second story.

I never knew a woman to have closet room enough except in some plan like this. Builders haven't sufficient nerve to work good space into closets or store rooms but when they catch a roof proposition like this they just love to take advantage of the situation and arrange closets and cubby holes in every corner possible.

Probably six rooms with the minor conveniences were never worked into a house of this size to better advantage. The size on the ground is 27 by 33 feet exclusive of porches and this is not a very liberal allowance. The high price of building materials has caused architects to sit up nights to invent new combinations that will give the necessary room and comfort for a small outlay in money. It makes a great difference in building whether you pay \$15 per thousand for lumber or whether you pay \$60. It takes just as many shingles at \$7 as it used to take at \$2.50 and I don't see that they turn the water any better. They come high now but we must have them the same as of old and it is poor economy to try to stretch them. If a shingle does it catch three joints the time will come before long when the roof will fall to do its duty as an honest roof should.

A great deal depends on the roof

design and that is the way the chimney is built. It is placed in the center of the house where it answers for kitchen range furnace and for both grates. When you are building a chimney it costs but little more to build it large enough for three or four flues. There is another advantage in placing the chimney in the center of the house and that is where it goes through the roof. It is easy to prevent

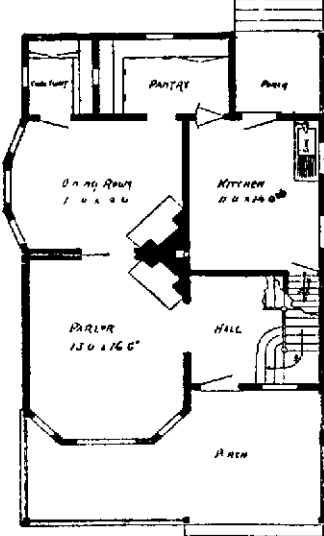

SECOND FLOOR PLAN

leakage around the chimney at the peak because no water accumulates at that point. When you put a chimney through a roof down near the eaves the water from a heavy shower makes a rush for it from the peak down. By the time it reaches the chimney there is considerable accumulation and the first thing you know it is pouring into the room below along somewhere in the middle of the night when you

has considerable responsibility in rainy weather. I have seen costly decorations badly demoralized through no fault of their own but simply because the roof got tired of shedding water. My advice to a man putting up a house to live in is to pay particular attention to the roof. After the shingles are all nailed on it is a comfortable feeling to realize that the roof over your head is there for bus-

FIRST FLOOR PLAN

ness and that it is so thoroughly well nailed that the wind won't coax the shingles out of order or the sun induce them to curl up in dry weather. A good roof does not depend entirely on materials from which it is made. The pitch kind of roof has as much to do with it as the quality of shingles or placing of the sheathing. There is another economy in this

plan is that it is so thoroughly well nailed that the wind won't coax the shingles out of order or the sun induce them to curl up in dry weather. A good roof does not depend entirely on materials from which it is made. The pitch kind of roof has as much to do with it as the quality of shingles or placing of the sheathing. There is another economy in this

would rather not be bothered with matters of that kind but your wife will insist that you give it your immediate attention regardless of the weather. There is still another advantage in putting the chimney in the middle of the house. Sometimes outside chimneys fail to draw satisfactorily because the flues will not warm up. You can get a good lively current of air to climb up through a cold chimney but when you have it surrounded as this chimney is you can keep in a good comfortable frame of mind even in the coldest weather. Most people object to a chimney that won't draw.

A splendid feature about this house plan is the kitchen and pantry. They are both roomy and they are both light and airy. It makes no difference what materials cost if we want comfort in the house we must have a good commissary department with storage for dishes and storage for eatables. When you have a kitchen 11 by 14 feet shut off from the rest of the house but easily accessible through double pantry doors and when such a kitchen is provided with two large cheerful windows and a door opening out onto a pleasant back porch with an easy entrance to the cellar and running water at the sink you have about everything that you can get in a kitchen. Of course it is understood that the kitchen is furnished with a good range with hot and cold water and a hardwood floor good wainscoting and the walls decorated in some light attractive color.

These are little things but we can not leave them out and satisfy the women folks and we must remember that the women are the ones to be pleased when it comes to the house and especially the kitchen end of the house because that is where they spend a great deal of time and where they do a great amount of hard work principally for our comfort and good health.

Delicacy of Beauty
Beauty is a metal so delicate that the slightest breath of ill nature will tarnish it.

THE ARMY WORM AND ITS METHOD OF WORK

In Large Numbers They Are Exceedingly Destructive to Vegetation, and Even Trees.

There are many worms that are called army worms and it is therefore necessary to distinguish between them. In a report issued last December the Minnesota station called attention to the injury this worm is doing to timothy meadows. It was predicted that the coming season will show still greater damage.

This is one of the cut worms and it is found in such numbers some seasons that it is known as the army worm in certain localities. Its life history is similar to the other cut worms. The female moth lays about 500 eggs on blades of grass placing 15 or 20 or more on each blade of grass. These eggs hatch in from six to ten days and the minute larvae begin at once to attack the grass on which they are born. Frequently a farmer will see the effect of their work without being aware of their presence. They attack not only grasses but the cereals and corn. Occasionally they attack the foliage of the apple tree.

It takes the worms about from one

The most effective method of combating the army worm is ditching. If two or more furrows be turned up with a plow between the advancing army and the crop which it threatens the steep side of the furrow being to ward the crop the worms tend to congregate therein brought to a stop by the wall of dirt. These furrows should be about two feet or more apart.

It is better yet if time and labor are available to dig a ditch next the crop that is in danger since it is harder for them to extricate themselves from a ditch than from a furrow. Several furrows will however check them till they can be killed. Killing can be accomplished by putting dry straw on the worms in the furrow and hurriedly firing it after wetting it slightly with kerosene. Or kerosene may be poured directly on the worms. This in itself is fatal but very expensive.

Crushing the worms when in the ditch or furrow by dragging a small log or piece of timber through it is

The Army Worm Larvae and Moth

to two months to reach their full size and at that time they are about one and one fourth inches long. They are characterized by four broad stripes on each side the two upper ones being brighter than those below. When the caterpillar has obtained its full size it works its way an inch or more into the ground where it undergoes transformation. The moths do not emerge from their pupal state till the next summer.

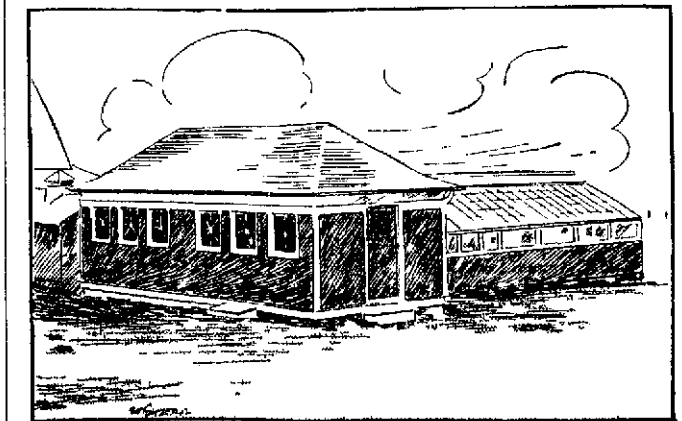

The Minnesota station says of them. In their marches it is asserted the caterpillars will sometimes destroy young fields of flax by biting off portions of the plants without utilizing them for food.

Bulletin 100 of the Minnesota station advises the following treatment

practically by some. Full plowing (as late as possible) is in the case of many other cutworm insect pests is excellent as it exposes many of the pupae while the birds can find them and variations in the weather can affect them. Sometimes the deep plowing, buries them so deeply that the moths cannot emerge from the soil.

Some spread dry straw on them when on their food plants and fire it thus burning them and saving them attacking a nearby crop which would otherwise have suffered. Inasmuch as the vicinity of old straw stacks of feed is an ideal place for hibernation such rubbish which is also a haven of refuge for other pests as well should not be allowed to stand undisturbed for any length of time.

Insectary at the Minnesota Experiment Station

This building makes possible the study of insect life at any time of the year thus enabling the entomologist

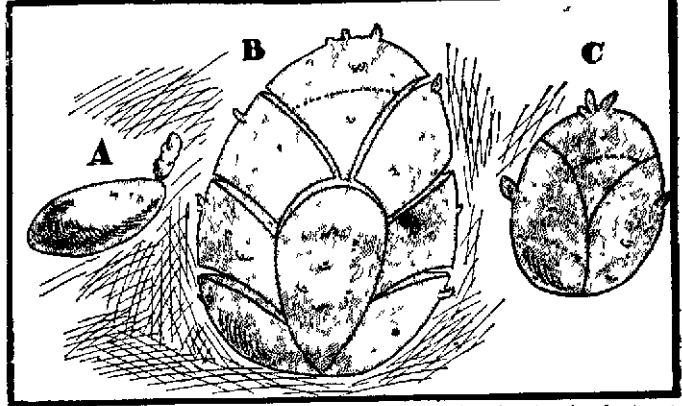

to make the most economical use of his time and thus accomplishing the best results.

Cultivation of Corn—The first cultivation should be close to the hill but as the corn grows the shoulders should be set farther from the hill to avoid injuring the roots. It is through the roots that the food which makes a large part of the ear is taken and if half the

roots are cut off it is reasonable to suppose that the formation of ear will be but half as large.

The Toothless Hen—Make the same use of the toothless hen as you do of the garden snail.

How Seed Potatoes Are Cut Into Sets

In the largest specimen the cuts are made just above each eye and in a downward direction to give best support to the sprouts.

AN ODE TO A SPRING LAMB

He buys old ewes when the market is low And pays the freight from South Omaha Listen to the sheepman talk

He feeds them up on alfalfa hay And gives them corn three times a day Listen to the sheepman talk

When they are fat and ready to ship He writes to the salesman to give him a tip Listen to the sheepman talk

He puts his sheep in a double deck freight And back to Omaha sends them straight Listen to the sheepman talk

When they get there they are put in a pen And fed on hay till they're full again Listen to the salesman talk

He says they were shipped right off the line He takes all the pickers right down the change Listen to the salesman talk

Then he takes a turn through the pack train And is ready for sale to the market man Listen to the pickers talk

Then they are hung on the butchers' rails And offered for sale to the freckle faced boy Listen to the butcher talk

He says they are young and juicy and says a kid like this would make a treat Listen to the butcher talk

She takes a leg of mutton and puts it on a spit But it won't cook through by hook or crook Listen to the servant's oil

The husband comes home at noon to find the meat so brown and so fat Listen to the housewife brag

What in hades is you call this meat? It smells like a lamp in a temper heat Listen to the husband yell

It's old and it's tough and it's dry as a stick Where did you get the measly stuff? Listen to the scoldish din

I bought it to-day of the marketman He said 'twas a nice little fat spring lamb Listen to the housewife's plea

A lamb it was in the days of yore I will never see ten and a score any more Listen to the horrid mum

I thought it was one that Noah had Then he said words that were awful bad Listen to the husband swear

But the sheepman smiled as he took his cash And bought a thin r of 50 cent hash And listened to the waiter's talk

He put on his hat and did up the town Like the leg of mutton he did it up brown Listen to his gleeful talk

He fattened those ewes in his own good day But not to eat he's not built that way Listen to the sheepman laugh

—CHARLOTTE WHITNEY

THE ESSENTIAL TO FARM FERTILITY

By H. R. Smith, of Nebraska Experiment Station.

The maintenance of a high degree of soil fertility is a fundamental principle in successful farming. Had this been recognized years ago and methods practiced that build rather than deplete much of the native fertility of our eastern soils would have been conserved. Live stock in the state of Ohio began to decline in number 30 years ago and with that decline there occurred almost immediately decline in the average yield per acre of wheat and other small grains. That state now purchases annually \$2,000,000 worth of commercial fertilizers. What has been the experience of Ohio is the experience of many other eastern states where grain growing without rotation with hay plants is now practiced.

The growing of such legumes as alfalfa, clover and cow peas, and the

feeding of these crops with at least a part of the grain grown, is our surest preventive of soil improvement. It goes without saying that this can only be accomplished by keeping the stock on the farm. If by feeding farm animals no more than elevator prices are received for the crops grown there is still abundant reason for the practice of such system of farming. Many do not feed stock because they are fearful that grain thus disposed of will sell at a sacrifice. No doubt this is true, if carelessness is displayed in the feeding and management. With the exercise of skill the opposite is just as true.

Each year as the results of experiments are compiled and the work of other stations reviewed new proof is added to the fact that a careful system of feeding in which nature's laws are given recognition is capable of producing to a marked degree larger and more profitable gains than indiscriminate feeding. It has been proved beyond a doubt that the cost of producing grains may be reduced from 20 to 30 per cent by properly compounding rations. Such evidence is forthcoming from all stations of the middle west, where feeding questions have been given most consideration. Should a farmer lose by disease one animal out of every five he would feel much unconcerned. The equivalent of this is happening on many farms today through injudicious feeding.

If stock feeding is to be conducted with profit there must be put into the work a high order of intelligence. How can it be otherwise? The feeder is in constant touch with nature's laws which must not be ignored. He is dealing with a wide range of foods, differing essentially in physical character in composition and digestibility. He is furthermore dealing with an animal mechanism infinitely more complex in the arrangement of parts and the performance of functions than anything ever wrought by man. If all foods and all classes of animals were alike the problem would be a simple one. If all foods consisted of the natural herbage which at one time grew uncultivated animals would rot for themselves more nearly what the system requires. But the artificial propagation of numerous forms of food (some kinds produce in greater abundance than others) has made the economical utilization of such foods a complex science. Nor can profitable stock feeding be looked upon as a science merely. It is a business too, in the sense that one who is engaged in the work is each year confronted with a change in prices on foods, which compels him to keep posted on market quotations in order to be able to select those which go farthest for the money. Why should not the stock farmer give just as much study and preparation to his business and profession as does the lawyer, physician or engineer? As our population increases and land becomes higher in price this is constantly becoming more imperative.

DESIRABLE FEATURES OF A SEPARATOR

By Prof. E. H. Van Norman

- Some of the desirable features of a separator are:
 - 1 Clean skimming under a wide range of conditions such as warm and cold milk and thick or thin cream. The skim milk from a good separator properly run should not contain to exceed one twentieth of one per cent of fat and under ordinarily favorable conditions should show even less than that in the double neck test bottle.
 - 2 Ease of washing, all parts should be so arranged as to be easily gotten at for washing—few corners and tubes.
 - 3 Easy running. All machines of the same manufacture are not equally easy running.
 - 4 Durable construction.
- In Destroying Weeds.—In combating any plant or grass which has become a weed it should be remembered that it is necessary for any vegetable life to have a leaf system above the ground before it can live. If this is destroyed, there will be no plant. If the leaves are kept from appearing above the ground it will not be long till the weed or grass pest is overcome.
- Use Only Fresh Eggs.—Don't expect the incubator or the settin' hen to hatch ancient eggs. An egg begins to deteriorate as soon as laid. Like the hen that laid it, it doesn't improve with age.

Oil Burners on Frisco.

Muskogee, I. T. June 22.—After testing the crude oil obtained in the Cherokee oil fields in the engines of the Frisco Railroad Company, in the place of coal, Frisco officials declare it is a pronounced success, and is in many ways far superior to coal. Oil is now being burned in the engines of this road out of Kansas City as far south as Springfield. The first test of the new fuel was made in passenger engines two weeks ago, and since that time not a pound of coal has been used. The road has been burning oil in its switch engines near Sulphur for two years.

New Frisco Superintendent.

Denison, Texas, June 22.—A. J. Giger, formerly with the operating department of the Colorado and Southern, has been appointed superintendent

of the Red River division of the Frisco, with headquarters at Francis, I. T. vice, J. W. Walton, who resigned to succeed A. D. Birtchard as superintendent of transportation and car service for the Katy, with headquarters in Denison.

Sure!

With Hoff and Ada prospecting for oil and gas and Fitzhugh after zinc and lead, it's only a matter of time till Pontotoc will be among the banner mineral producing counties of the new state.—Roff Eagle

Mr. Hamilton Here.

J. A. Hamilton, vice president of the Ada Electric and Gas company, is here from Marissa, Ill., both on business and pleasure bent. His company is naturally interested in the electric railway project described in Friday's News.

Something Needed Portland Park Addition

Lots near the big Cement Plant to accommodate the hundreds of laborers to be employed in this great industry. This need has been met by laying out the Portland Park Addition just west of the cement plant. Lots are 30 feet by 140, with 60-foot streets and 20-foot alleys. Prices of lots are from \$20 to \$30. Terms, \$5 down and \$2 per month. A large reservoir is to be built on the north side by the cement company which will afford boating and fishing.

The Title is Perfect and the Location Sightly and Healthful. Get on Easy Street by Buying Lots in Portland Park. Homes in the Reach of All in Portland Park Addition. Plant your Money in Portland Park and let it Grow.

Real Estate is the foundation of wealth—it's safe and sure. Get in on the ground floor at Portland Park

Only room for 50 families in Portland Park while hundreds will be needed. This is the only land that will be available for years. Have you seen Ada lots advance one hundred and even one thousand per cent, while you waited to see what the town would do? Take a tumble to yourself and buy lots in Portland Park. These lots are being sold at half their real value and on terms within the reach of all.

REPUBLICANS ARE REVOLTING

Want the Constitution and Statehood--Threaten to Overthrow Leaders Who are Trying to Commit Party to Contrary Attitude

Tulsa, I. T. June 22.—The announcement was made today by Judge Clarence L. Leeds, a prominent Indian Territory republican leader, that unless the republican state committee ceases its fight upon the constitution for Oklahoma by July 1, a mass meeting of the two Territories will be called in Tulsa to arrange for holding a state convention independent of the action of the state committee. The mass meeting will declare for immediate statehood, support of the constitution, and will pledge the republican

party to amend the objectionable features of the constitution either by legislative act or by the initiative and referendum. The movement is backed by William Johnson of Bartlesville, a member of the republican state committee; Col. George Murphy of Muskogee, Col. William Busby of South McAlester and Henry P. Robbins of South McAlester, and it is said to have the endorsement of Judge W. G. Raymond, the republican leader of Muskogee.

STATE CLOSES ITS CASES

Court Overrules Haywood's Motion to Dismiss--Defense Must Produce Its Evidence--Adjournment Till Monday.

Boise, Idaho, June 21.—When the state today closes its case against William D. Haywood, charged with the murder of Frank Steenberg, the defense made an unsuccessful attempt to secure from the court an order directing the jury to acquit the prisoner. Judge Wood's ruling, which requires the defense to meet with evidence the case which the state has presented was made at 5:15 o'clock and it was then arranged that Haywood's counsel should make their opening statement and present their first testimony on Monday next.

When the trial opened this morning it was stipulated that the record should show the record of the draft sent by Haywood to Jack Simpkins late in 1905 was Dec. 21, and after that prosecution proceeded to show by a handwriting expert that George Pettibole, using the name of "J. Wolff" and of "P. Bone," made two remittances of money to Harry Orchard at San Francisco through the Pacific Postal Telegraph Company in the fall of 1904.

The state next called Jim Seaborn, a colored horse trader, who swore that he sold a horse and buggy to Orchard in Denver, 1905, and identified Haywood as one of the men who rode with Orchard.

After that the defense admitted that in June, 1905, Haywood sent \$75 to Steve Adams at Ogden, and when the necessary showing had been made on the record, the prosecution formally rested.

The motion for an instruction to the jury to acquit was by agreement presented at the afternoon session and the jury was sent back to the jury house out of hearing of the argument.

Attorney E. F. Richardson made the principal argument in support of the

motion, in a long, carefully prepared and eloquent address.

He took for his guide the Idaho statute which forbids conviction upon the uncorroborated testimony of an accomplice and, quoting many authorities in support of his contention that there must be convincing corroboration entirely independent of the testimony of the accomplice, made an analysis of all the testimony offered. He declared that none of the testimony could stand without support or Orchard's story and that the statute specifically forbids its acceptance under these circumstances.

He also argued that the testimony of Orchard was the only showing that in any way connected Haywood with the crime and that the statute forbade conviction under those circumstances.

Senator Borah, who also spoke for the state, argued with like force and eloquence that Haywood's connection had been independently shown and that Orchard's testimony had been corroborated by independent circumstances and evidence. He also submitted a general argument to show that the state had established the existence of a general conspiracy in which Haywood was a participant and in which he strongly developed the alleged participation and connection of Simpkins.

Clarence Darrow, who closed, pleaded that there was not a shred of evidence in the case capable of standing without the "rotten thread of Orchard's story" to sustain it, and that the plain provision of the Idaho statute made the duty of the court clear. He ridiculed the idea of general conspiracy and contended that if the most liberal allowances were made for the entire showing of the state that it would not make out a case against the prisoner worthy of submission to the jury.

ICE PLANT TO START UP

After Several Months' Shut-Down Trial Run Will Be Made Next Week.

R. L. Woodhouse, owner of the Ada Ice Plant, is here from Sharon Springs, Kansas, to overhaul the plant and to resume operation.

Several months ago the institution got entangled in court proceedings. Mr. Woodhouse says it is now entirely clear of any impending claims, and that some time next week he will start it up for a trial run. After months' of disuse, naturally the machinery requires considerable overhauling before it is fit for operation.

It so happens that the weather this season has been so changeable, that little has been lost by the plant's being shut down. So far all over the country the ice business has been a losing proposition this season.

SOROSIS YEAR-BOOK

Popular Woman's Club Preparing for Next Season's Work.

The News is just completing a neat job for Sorosis Club, the popular organization for Ada ladies. It is a dainty little year book, or outline of the work for the coming club year—October to April. Next season will be devoted to a thorough study of "Macbeth." The club meets twice a month with the members in rotation—hours 3 to 5, p. m.

Sorosis' motto is "In Unity There is Strength;" colors, pink and green, flower, carnation. The present officers are: President, Mrs. R. F. King; Vice President, Mrs. C. E. Robertson; Secretary, Mrs. W. G. Broadfoot; Treasurer, Mrs. W. W. Sledge; Program Committee, Mrs. R. F. King, Mrs. I. J. Berry, and Mrs. W. S. Thompson.

Public Installation.

The order of the Eastern Star will have an elaborate function in the hall Saturday evening, June 29, to which the public is cordially invited.

The new officers will be installed and toothsome refreshments will be served. The Eastern Star has an enviable reputation for doing things

"handsome," and doubtless the hall will be full of visitors.

It Took a Ride.

Geo. Redding, living about eight miles southwest, was in town one day last week for the purpose of ordering a buggy wheel. A week ago a miniature cyclone entered into his place, kicked his smokehouse to pieces, tore down his buggy shed, hoisted his new buggy into the air, climbed into it and rode about 200 yards and placed it gently back on the ground. Before leaving it tore every spoke out of one wheel, twisted the tire and buggy was uninjured. Unhatched cyclones are dangerous animals.—Roff Eagle.

Indian Ball Games.

Senator Amos Hays, F. M. Hudson and Col. Gus Angelly were in town today having printed some posters advertising Indian ball games between full blood Choctaws and Chickasaws.

They have gathered a big bunch of players from the surrounding country and will make a tour over the east, including Eureka Springs, Ark. The games will be played with all the marvelous skill and in all the picturesque which characterized the sport as engaged in by the aborigines centuries ago.

WHERE WAS THE CAT?

Admitting the Meat Owner Wanted to Be Shown Feline

A certain family living in one of the suburbs of New York owned a kitten of which they were very fond. When they went away for the summer it was decided after various consultations to leave the kitten with the butcher on condition that he should treat it with the greatest kindness and give it about a pound of meat a week besides its daily allotment of cream. Some weeks after the family had closed the house for the summer the nominal head of the family visited the suburb to attend to some business matters and decided that he might as well drop in at the butcher's to see how the kitten was getting along.

He found the kitten curled up in a corner asleep and apparently at peace with the world but far from being sleek or well fed in appearance. It was so thin that he felt constrained to call the attention of the butcher to the fact.

"Do you mean to say you have fed that cat a pound of meat during the last week?" he asked.

"I certainly have responded the butcher."

Put him on the scales and see how much he weighs.

The butcher did as requested and gently deposited the kitten in the balance. The pointer indicated exactly one pound.

Well granted the owner of the animal there's the pound of meat all right but where's the cat?

TREES THAT ARE A MYSTERY

One a Vegetable Freak and the Other a Greedy Monopolist

California has one tree which is the personification of mystery. I find no where else in the world it has a mysterious origin and thrives in a land of mystery.

The Mojave yucca is a vegetable freak which has developed into a species. It has the characteristics of several plants to which no relationship can be traced.

It is an endogen yet its bark shows concentric rings such as characterize the exogenous stems. It lives and thrives in a land of numbers in a region early level of vegetation in a land of heat and thirst and barrenness.

An other tree in California which has a peculiar personality is the creeping oak of Monterey.

Nowhere in the vegetable kingdom can be found so true a representative of man's life. This tree is of an ivy growth its limbs like those of the acacia are bending and twisting in all directions.

Wherever a branch touches the earth it takes root and becomes as it were another trunk though still a branch of the main stem drawing nourishment both from the parent stem and from the new source. In this manner the tree is spread till it has taken possession of five acres of ground and it is still advancing.

Something of a Talker.

Jobkin's wife has nervous prostration.

What caused it?

"Too much brain work."

"Brain work?"

"Sure!" She made a resolution New

Years that she would always think before she spoke and she has been doing more thinking than she was used to. —Houston Post

Get Acquainted With the Soil

Grow the best of everything for pleasure and profit. FARM AND RANCH will introduce you and direct you on the road to success. It tells you how in combination with soil and climate to grow the best of everything—it tells you how to harvest what you grow and more important still tells you how to market with greatest profit what you have produced. It has departments of special interest to each member of the family—father, mother, son, daughter—and each department contains clean, reliable, interesting, instructive, original matter prepared specially for FARM AND RANCH. No second hand or done over articles printed first in other editions or publications. No whiskey patent medicine or other injurious fraudulent or unclean advertisements. FARM AND RANCH does not claim in the reading matter to be honest and then through its advertising columns lure you into the clutches of those who will rob you of your money, health or character. Its Correspondents' Department contains specially prepared articles by successful men and women who tell the soil and know what they write about. Its Household Department is edited by a woman of experience and ability who is assisted by many of the most learned and able and refined women in the Southwest. Editorially and every other way its proprietors and editors fight for the right of the producers, and will continue to do so. It has no interest in any other publication or business not in direct line with this policy. FARM AND RANCH is the honest man's friend, the home builder's guide. Every home would be benefited by its weekly visits. It costs nothing to learn all about this great family farm and stock journal. Why not try it in your home? Write for free sample copy and home test proposition. FARM AND RANCH PUB. CO., Dallas, Texas.

Farm and Ranch or Holland's Magazine and The Weekly News one year for \$1.50. Send in your subscriptions at once.

FIRST NATIONAL BANK

PERSONAL MENTION

If you know it tell it or telephone it to The News. Keep in mind that the reporter is gifted with neither omniscience nor ubiquity.

Ed Brents was in Welecka last night on official business.

Miss Jess Welch left today for St. Louis to spend the summer.

M. and Mrs. W. A. Guest returned home from a visit to Wynnewood and Sulphur.

Dr. R. D. Love, formerly of North Bend, Oregon, is in the city prospecting for a new location.

W. A. Wimbish of Ardmore, arrived this morning to join his family who are visiting at the home of his brother, Robt. Wimbish.

O. C. White was here from Midland. Jno. H. and J. R. Burford and W. C. Seabolt of Stratford were in the city last afternoon.

T. H. Gendron, after a seven week's lay off in Ada due to ill health, was able today to resume his duties as traveling salesman.

Judge Joel Terrell came in last night from a ten day's visit with old home folks in Lamar county, Texas. He looks fully recuperated from the strain of his recent successful campaign for county judge.

Preaching tomorrow at the First Presbyterian Church at 11 a. m. Sabbath school at 10 a. m.; Junior Christian Endeavor at 4 p. m.

No night service on account of revival at Methodist church.

Don't forget to be at Roff July 4th. All kinds of amusements, good speaking, plenty to eat, good water, fine shady park. Be sure and see the fire boys' contest at night. The house can't burn, the boys are after the flames.

Gasoline Stove Blew Up.

Mrs. C. M. Chauncey had an exciting experience today with her gasoline cook stove. The thing blew up and damaged a window. She had the bravery to pick up the flaming portion of the stove and throw it out of doors. Fortunately no serious damage resulted.

Church Notice.

A cordial and urgent invitation is given to everybody to attend the services tomorrow at the First Baptist church. The Sunday school meets at 10 a. m.; preaching services at 11 a. m. and 8:15 P. M. Special music at both preaching services. For special reasons the members of the church are urged to be present at the 11 o'clock service. All the singers are urged to be present this evening for choir practice.

Methodist Service.

Bro. T. L. Rippey will preach Sunday at 11:00, again at 3:00, which will be to the children and again at 8:30 p. m. You are invited.

Rained the Fishers Out.

Mayor C. O. Barton, Robt. Kerr, and Geo. Thompson returned Friday night from a five day's fishing excursion over in the Choctaw near Citra.

While they had some pretty good sport and never had to go hungry, it rained on them so much that the trip was by no means a success.

Revival Tent Blown Down.

The big tent in which the Baptist revival is being conducted in North Ada succumbed to the high wind of Friday night. However it was only blown down, not rent.

The tent is again set and the revival goes on under management of pastor G. W. Jefferson. Rev. W. R. Chandler, who began the preaching, had to withdraw from the meeting and has joined his wife at Tecumseh. Bro. Jefferson has secured the services of Rev. C. W. Hampton of Pauls Valley, an able evangelist who is now doing the bulk of the preaching. In spite of the discouraging weather much good is being done in this revival.

It Wasn't a Nice Night.

Friday night was a trying night on those timorous about tornadoes. Beginning about ten o'clock, the elements proceeded to cut up all night long. The lightning flashed and the clouds milled about and the populace clung close to the "frail holes". Yet there has been reported no damage to life, limb or property.

Free Lecture.

Hon. John A. Bright national lecturer for the Improved Order of Redmen will deliver a free lecture on Redman ship at the court house, in Ada, on the evening of June 25, 1907, under the auspices of Geronimo, Tribe No. 18, Improved Order of Redmen. Everybody, the ladies especially, are cordially invited. Come out and hear him and spend a pleasant evening. You will be amply repaid for your trouble. Mr. Bright always sings at the close of his lecture. It is all free.

J. D. Looper,
F. M. Vanlewen,
Committee.

Honor Roll of Pupils.

Ernest Cassidy, Bailey Lovett, Little Perryman, Byrd Chapman, Bertha Cassidy, Clanche Cole, Marvin Cassidy, Annie McDaniel, Blaine Cole, Venas Vaughn, Ruine Ross, Phyllis Steiner, Annie Cutts, Mac Anderson, Luther West, Byron Little, Edith Adams, Mildred Adams, Mildred Steiner, Fred Morris, Loyd Little, Daphne Nichols, Bonnie Coleman, John Chapman, Sahe Moss, Virgie Lowery, Ree Coleman, Pearl Little.

Success in life is accompanied by increase of enemies. That's why Hollister's Rocky Mountain Tea has so many imitators. It's a success 35 cents, Tea or Tablets. Ramsey's drug store.

Wright and Berry, tailors, next door to postoffice, for high class work. 48-1f

All the children are especially invited to the children's services at 3 p. m.

Ada tailoring and cleaning works east of postoffice. 48-1f

Now it's the Orange Cure.

Young women are this spring devoting themselves to the orange cure. It consists in taking the juice of two oranges three times a day before meals, or after, if it is preferred. Oranges are said to be particularly healthful in the spring, and to give the person who adheres to the regimen a beautiful complexion, better even than that which is supposed to be obtained by eating one raw carrot daily. It surely is a much more desirable remedy.

After the Collision.

He—I beg your pardon. Did I hurt you head?
She (arranging her hair)—No, only my rat.

Advice to Wives.

Nothing is so consoling to a worried man of affairs as to know that he can always find a harbor of refuge in his home.

Hence (advises an observant woman), the wife should seek ways to make the home an abode of peace. Her troubles and perplexities should be reserved for discussion when he is comfortable and at leisure, and not sprung upon him the moment he enters the house at the close of his day's work.

Many men fight their way successfully through years of anxious toil only to be broken down at last by the frets and jars of ill-managed households and the incessant gabble of wives who insist on deluging them with their domestic grievances.

While it is said every thing is going up look at our

Ship's Remarkable Voyage.

A remarkable voyage south to Buenos Ayres was made the last part of last year by the barque Stratheda, of Boston, details of which were related the other day, when the barque arrived back at Boston. She started with a cargo of lumber and had nothing eventful happen until September 26, when a hurricane was encountered. The barque was thrown on her beam ends and by a shift of current she stayed and did not return. She remained for the remainder of the voyage of 4,000 miles. Fortunately she met no more very bad weather and with her heavy list to starboard she made landings at 29 days. The voyage so protracted that the crew feared she was lost.

Implicit Obedience.

The famous Field family, Cyrus and his brothers and sisters, have brought up to obey. The father was a clergyman with \$300 a year for his children, and frugality and thrift were absolutely necessary. On a useful rat trap was missing. The father gave orders that when it was found it should be brought directly to him. A few days afterward during service, when the sermon was in full swing, there was a clattering up the aisle. It was two of the Field boys carrying the rat trap. They gravely set it down before the pulpit. One of them said simply: "Father, here's your rat trap." Then they turned and went out.

The Motive.

"If Miss Hoanley-Rich wants that cake out hers to do anything for her I'm sure she's got to command him." "He's like dough in her hands." "You mean he likes the dough for name."

Notice of Sale.

United States of America, Indian Territory, Southern District, ss:

Whereas, on the 12th day of August, A. D. 1905, to secure the payment of their four promissory notes of that date of the sum of \$2250 each, payable to the order of Walter B. Paschall, as follows: One February 1st, 1906, one August 1st, 1906, one February 1st, 1907, and one August 1st, 1907, all bearing interest at the rate of 8 per cent per annum from maturity until paid, Robert M. Cummings and Allie B. Cummings, of Ada, Indian Territory, made, executed and delivered to the said Walter B. Paschall a mortgage on the following described property, located in the city of Ada, Chickasaw Nation, Southern District of the Indian Territory, to-wit:

Lot ten (10) and the east half of lot nine (9) of block twelve (12) of Dagg's Addition to the City of Ada, as shown by the official plat and survey thereof, together with all the improvements thereon and the appurtenances thereunto belonging and, Whereas, it was especially understood and agreed between the parties

FOR SALE—By O. B. Weaver improved and unimproved, both business and residence property, at a "hard up" bargain.

thereto, and so expressed in said mortgage, that in event of default being made in the payment of any one of said notes when due, the said Walter B. Paschall, or the then legal owner and holder of said notes, were given the option and the right to declare all said notes due and payable, and to sell the property, or any part thereof, at public sale to the highest bidder for cash, at the then front Court House door, at Ada, Indian Territory, after giving thirty days notice of the time, place and terms of sale, by publication of notice thereof for thirty days in some newspaper published or of general circulation in said city and Territory, or by printed or written hand bills posted in ten public places in the vicinity of said land, and to apply the proceeds of such sale, first to the payment of all costs, and expenses attending said sale, second to the payment of said debts and interest, and the remainder, if any, to be paid to the said Robert M. Cummings and Allie B. Cummings, their order or assigns, and, Whereas, the said Robert M. Cummings and Allie B. Cummings failed to pay the second and third of said notes at maturity, or any part thereof, either principal or interest, and the said Walter B. Paschall, the owner and holder of said notes, has therefore, as authorized in said mortgage, declared all said indebtedness due, now.

Therefore, KNOW ALL MEN BY THESE PRESENTS:

That I, Walter B. Paschall, mortgagee aforesaid, for and in consideration and by virtue of the foregoing, will, on Tuesday, the 25th day of July, A. D. 1907, between the hours of 9 o'clock a. m. and 5 o'clock p. m., at the front door of the Court House of the United States Court, at Ada, Southern District of the Indian Territory, sell to the highest bidder for cash to be paid at said time, all of said property above described, for the purpose authorized by said mortgage which will be free from redemption, appraisement and dower. However, said property will be sold subject to a prior mortgage in favor of the Denning Investment Company given to secure the principal sum of \$300.00 and interest thereon.

Witness my hand on this 22nd day of June, A. D. 1907.

Walter B. Paschall,
Mortgagee.

First published June 22nd, 1907.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure by local treatment, pronounced it incurable. Science has proved catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials.
Address: F. J. Cheney & Co., Toledo, Ohio.
Sold by Druggists, 75c.
Takes Halls Family pills for Constipation.

THE AMERICAN HOME

W. A. RADFORD
EDITOR

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer he is without doubt the highest authority on all subjects. Write to him at 194 Fifth Avenue, New York City, and only on last two cent stamp for reply.

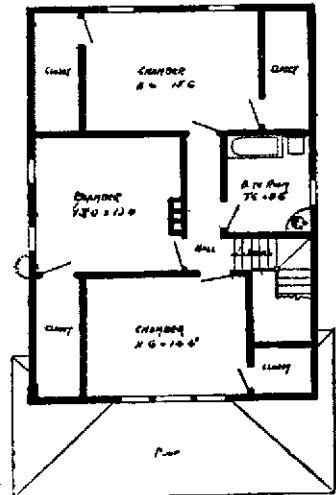

It is possible with this plan to build a good sensible stylish house for a small amount of money because the arrangement is so economical. It is a little more than a cottage in height yet the plan is so complete that three good square bedrooms with bathroom and plenty of closets are worked in close under the roof in the second story.

I never knew a woman to have closet room enough except in some plan like this. Builders haven't sufficient nerve to work good space into closets or store rooms but when they catch a roof proposition like this they just love to take advantage of the situation and arrange closets and cubby holes in every corner possible.

Probably six rooms with the minor conveniences were never worked into a house of this size to better advantage. The size on the ground is 27 by 33 feet exclusive of porches and this is not a very liberal allowance. The high price of building materials has caused architects to sit up nights to invent new combinations that will give the necessary room and comfort for a small outlay in money. It makes a great difference in building whether you pay \$15 per thousand for lumber or whether you pay \$60. It takes just as many shingles at \$7 as it used to take at \$2.50 and I don't see that they turn the water any better. They come high now but we must have them the same as of old and it is poor economy to try to stretch them. If a shingle does it catch three joints the time will come before long when the roof will fall to do its duty as an honest roof should.

A great deal depends on the roof

design and that is the way the chimney is built. It is placed in the center of the house where it answers for kitchen range furnace and for both grates. When you are building a chimney it costs but little more to build it large enough for three or four flues. There is another advantage in placing the chimney in the center of the house and that is where it goes through the roof. It is easy to prevent

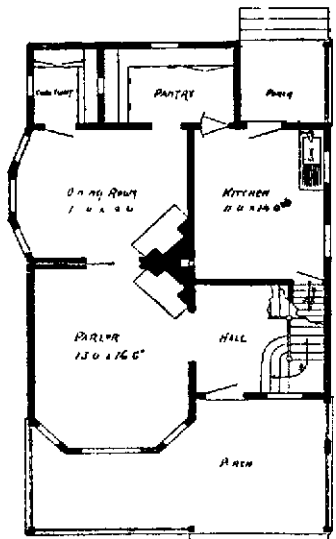

SECOND FLOOR PLAN

leakage around the chimney at the peak because no water accumulates at that point. When you put a chimney through a roof down near the eaves the water from a heavy shower makes a rush for it from the peak down. By the time it reaches the chimney there is considerable accumulation and the first thing you know it is pouring into the room below along somewhere in the middle of the night when you

has considerable responsibility in rainy weather. I have seen costly decorations badly demoralized through no fault of their own but simply because the roof got tired of shedding water. My advice to a man putting up a house to live in is to pay particular attention to the roof. After the shingles are all nailed on it is a comfortable feeling to realize that the roof over your head is there for bus-

FIRST FLOOR PLAN

ness and that it is so thoroughly well nailed that the wind won't coax the shingles out of order or the sun induce them to curl up in dry weather. A good roof does not depend entirely on materials from which it is made. The pitch kind of roof has as much to do with it as the quality of shingles or placing of the sheathing. There is another economy in this

plan is that it is so thoroughly well nailed that the wind won't coax the shingles out of order or the sun induce them to curl up in dry weather. THE ARMY WORM AND ITS METHOD OF WORK

In Large Numbers They Are Exceedingly Destructive to Vegetation, and Even Trees.

There are many worms that are called army worms and it is therefore necessary to distinguish between them. In a report issued last December the Minnesota station called attention to the injury this worm is doing to timothy meadows. It was predicted that the coming season will show still greater damage.

This is one of the cut worms and it is found in such numbers some seasons that it is known as the army worm in certain localities. Its life history is similar to the other cut worms. The female moth lays about 500 eggs on blades of grass placing 15 or 20 or more on each blade of grass. These eggs hatch in from six to ten days and the minute larvae begin at once to attack the grass on which they are born. Frequently a farmer will see the effect of their work without being aware of their presence. They attack not only grasses but the cereals and corn. Occasionally they attack the foliage of the apple tree.

It takes the worms about from one

The most effective method of combating the army worm is ditching. If two or more furrows be turned up with a plow between the advancing army and the crop which it threatens the steep side of the furrow being to ward the crop the worms tend to congregate therein brought to a stop by the wall of dirt. These furrows should be about two feet or more apart.

It is better yet if time and labor are available to dig a ditch next the crop that is in danger since it is harder for them to extricate themselves from a ditch than from a furrow. Several furrows will however check them till they can be killed. Killing can be accomplished by putting dry straw on the worms in the furrow and hurriedly firing it after wetting it slightly with kerosene. Or kerosene may be poured directly on the worms. This in itself is fatal but very expensive.

Crushing the worms when in the ditch or furrow by dragging a small log or piece of timber through it is

The Army Worm Larvae and Moth

to two months to reach their full size and at that time they are about one and one fourth inches long. They are characterized by four broad stripes on each side the two upper ones being brighter than those below. When the caterpillar has obtained its full size it works its way an inch or more into the ground where it undergoes transformation. The moths do not emerge from their pupal state till the next summer.

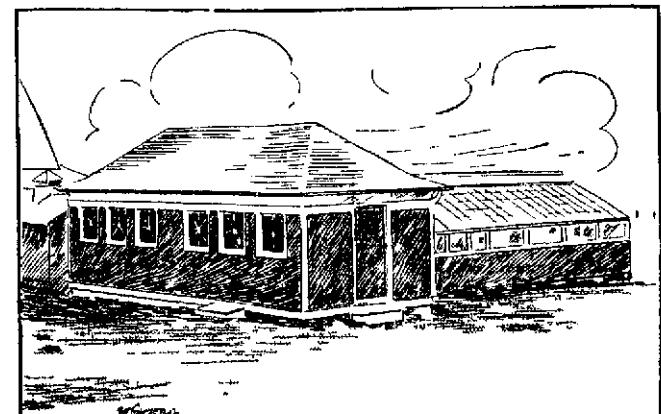

The Minnesota station says of them. In their marches it is asserted the caterpillars will sometimes destroy young fields of flax by biting off portions of the plants without utilizing them for food.

Bulletin 100 of the Minnesota station advises the following treatment

practically by some. Full plowing, (as late as possible) as in the case of many other insect pests is excellent as it exposes many of the pupae while they are in the ground and buries them so deeply that the moths cannot emerge from the soil.

Some spread dry straw on them when on their food plants and fire it thus burning them and saving them attacking a nearby crop which would otherwise have suffered. Inasmuch as the vicinity of old straw stacks of feed is an ideal place for hibernation such rubbish which is also a haven of refuge for other pests as well should not be allowed to stand undisturbed for any length of time.

Insectary at the Minnesota Experiment Station

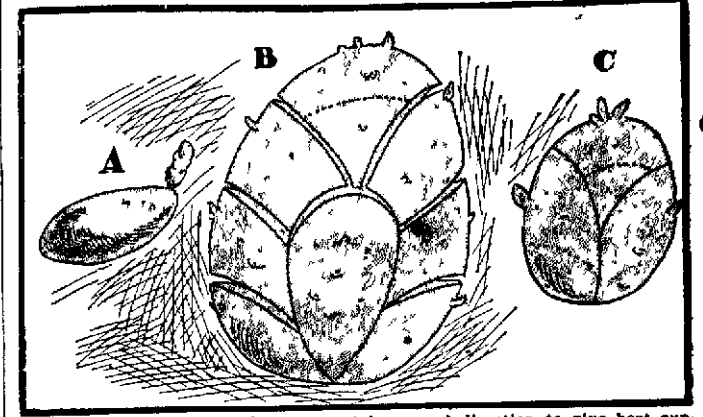

This building makes possible the study of insect life at any time of the year thus enabling the entomologist to make the most economical use of his time and thus accomplishing the best results.

Cultivation of Corn—The first cultivation should be close to the hill but as the corn grows the shoulders should be set farther from the hill to avoid injuring the roots. It is through the roots that the food which makes a large part of the ear is taken and if half the

roots are cut off it is reasonable to suppose that the formation of ear will be but half as large.

The Toothless Hen—Make the same use of the toothless hen as you do of the garden snail.

How Seed Potatoes Are Cut Into Sets

In the largest specimen the cuts are made just above each eye and in a downward direction to give best support to the sprouts.

AN ODE TO A SPRING LAMB

He buys old ewes when the market is low And pays the freight from South Omaha Listen to the sheepman talk

He feeds them up on alfalfa hay And gives them corn three times a day Listen to the sheepman talk

When they are fat and ready to ship He writes to the salesman to give him a tip Listen to the sheepman talk

He puts his sheep in a double deck freight And back to Omaha sends them straight Listen to the sheepman talk

When they get there they are put in a pen And fed on hay till they're full again Listen to the salesman talk

He says they were shipped right off the line He takes all the pickers right down the change Listen to the salesman talk

Then he takes a turn through the pack train And is ready for sale to the market man Listen to the pickers talk

Then they are hung on the butchers' rails And offered for sale to the freckle faced oil Listen to the butcher talk

He says they are young and juicy and says a knock they would make a treat Listen to the butcher talk

She takes a leg of mutton and puts it on a spit But it won't cook through by hook or crook Listen to the servant's oil

The husband comes home at noon to find his wife up the first so brown and red Listen to the housewife brag

What in hades is you call this meat? It smells like a lamp in a temper heat Listen to the husband yell

It's old and it's tough and it's dry as a stick Where did you get the measly stuff? Listen to the scoldish din

I bought it to-day of the marketman He said 'twas a nice little fat spring lamb Listen to the housewife's plea

A lamb it was in the days of yore I will never see ten and a score any more Listen to the horrid mum

I thought it was one that Noah had Then he said words that were awful bad Listen to the husband swear

But the sheepman smiled as he took his cash And bought a thinner of 50 cent hash And listened to the waiter's talk

He put on his hat and did up the town Like the leg of mutton he did it up brown Listen to his gleeful talk

He fattened those ewes in his own good day But not to eat he's not built that way Listen to the sheepman laugh

THE ESSENTIAL TO FARM FERTILITY

By H. R. Smith, of Nebraska Experiment Station.

The maintenance of a high degree of soil fertility is a fundamental principle in successful farming. Had this been recognized years ago and methods practiced that build rather than deplete much of the native fertility of our eastern soils would have been conserved. Live stock in the state of Ohio began to decline in number 30 years ago and with that decline there occurred almost immediately decline in the average yield per acre of wheat and other small grains. That state now purchases annually \$2,000,000 worth of commercial fertilizers. What has been the experience of Ohio is the experience of many other eastern states where grain growing without rotation with hay plants is now practiced.

The growing of such legumes as alfalfa, clover and cow peas, and the

feeding of these crops with at least a part of the grain grown, is our surest preventive of soil improvement. It goes without saying that this can only be accomplished by keeping the stock on the farm. If by feeding farm animals no more than elevator prices are received for the crops grown there is still abundant reason for the practice of such system of farming. Many do not feed stock because they are fearful that grain thus disposed of will sell at a sacrifice. No doubt this is true, if carelessness is displayed in the feeding and management. With the exercise of skill the opposite is just as true.

Each year as the results of experiments are compiled and the work of other stations reviewed new proof is added to the fact that a careful system of feeding in which nature's laws are given recognition is capable of producing to a marked degree larger and more profitable gains than indiscriminate feeding. It has been proved beyond a doubt that the cost of producing grains may be reduced from 20 to 30 per cent by properly compounding rations. Such evidence is forthcoming from all stations of the middle west, where feeding questions have been given most consideration. Should a farmer lose by disease one animal out of every five he would feel much unconcerned. The equivalent of this is happening on many farms today through injudicious feeding.

If stock feeding is to be conducted with profit there must be put into the work a high order of intelligence. How can it be otherwise? The feeder is in constant touch with nature's laws which must not be ignored. He is dealing with a wide range of foods, differing essentially in physical character in composition and digestibility. He is furthermore dealing with an animal mechanism infinitely more complex in the arrangement of parts and the performance of functions than anything ever wrought by man. If all foods and all classes of animals were alike the problem would be a simple one. If all foods consisted of the natural herbage which at one time grew uncultivated animals would rot for themselves more nearly what the system requires. But the artificial propagation of numerous forms of food (some kinds produce in greater abundance than others) has made the economical utilization of such foods a complex science. Nor can profitable stock feeding be looked upon as a science merely. It is a business too, in the sense that one who is engaged in the work is each year confronted with a change in prices on foods, which compels him to keep posted on market quotations in order to be able to select those which go farthest for the money. Why should not the stock farmer give just as much study and preparation to his business and profession as does the lawyer, physician or engineer? As our population increases and land becomes higher in price this is constantly becoming more imperative.

DESIRABLE FEATURES OF A SEPARATOR

By Prof. E. H. Van Norman.

Some of the desirable features of a separator are:

1 Clean skimming under a wide range of conditions such as warm and cold milk and thick or thin cream. The skim milk from a good separator properly run should contain to exceed one twentieth of one per cent of fat and under ordinarily favorable conditions should show even less than that in the double neck test bottle.

2 Ease of washing, all parts should be so arranged as to be easily gotten at for washing—few corners and tubes.

3 Easy running. All machines of the same manufacture are not equally easy running.

4 Durable construction.

In Destroying Weeds—In combating any plant or grass which has become a weed it should be remembered that it is necessary for any vegetable life to have a leaf system above the ground before it can live. If this is destroyed, there will be no plant. If the leaves are kept from appearing above the ground it will not be long till the weed or grass pest is overcome.

Use Only Fresh Eggs.—Don't expect the incubator or the settin' hen to hatch ancient eggs. An egg begins to deteriorate as soon as laid. Like the hen that laid it, it doesn't improve with age.
